

Hall Specifications for hall set-up and stand heights

The maximum height allowed for stands at the World of Industry, Technology & Science exhibition is 6 meters.

Hall 7

World:	World of Industry
Height of the hall:	10.19 meters
Is rigging possible?	Yes
Is rigging possible in areas with a lower ceiling?	No
Location of lower areas:	Under the passageway to hall 8
Max. height beneath this lower area:	3.60 meters

Hall 8

World:	World of Industry
Height of the hall:	8.10 meters in the centre of the hall. 7.10 meters at the side and front of the hall (ca. 12 meters from the wall on all three sides)
Is rigging possible?	Yes, but only to a limited extent where the height of the hall is 7.10 meters
Is rigging possible in areas with a lower ceiling?	No
Location of lower areas:	Within 2 meters of the wall on the whole right and left sides of the hall
Max. height beneath lower areas:	5.00 meters
Location of lower areas:	Under the passageway to hall 7
Max. height beneath this lower area:	3.60 meters
Location of lower areas:	The wall left and right near the entrance of the hall
Max. height beneath this lower area:	3.00 meters

Hall 9

World:	World of Electronics
Height of the hall:	7.20 (rear quarter of the hall) and 5.62 meters (front three quarters of the hall)
Is rigging possible?	Yes, only in sections that are 7.20 meters high
Location of lower areas:	In the rear quarter on the left and the right-hand side of the hall. Up to approximately 3 meters from the wall to the right and approximately 4 meters from the wall to the left.
Max. height beneath lower areas:	5.90 meters
Location of lower areas:	In the front three quarters are on the left and the right-hand side of the hall. Up to approximately 3 meters from the wall to the right and approximately 4 meters from the wall to the left.
Max. height beneath this lower area:	4.20 meters

Hall Specifications for hall set-up and stand heights

The maximum height allowed for stands at the World of Industry, Technology & Science exhibition is 6 meters.

Hall 10

World:	World of Laboratory
Height of the hall:	5.70 meters
Is rigging possible?	No
Location of lower areas:	The back end of the hall next to hall 11, up to approximately 4 meters from the wall
Max. height beneath lower areas:	4.25 meters
Location of lower areas:	The front of the hall next to the central passageway up to approximately 4 meters from the wall
Max. height beneath this lower area:	4.30 meters

Hall 11

World:	World of Laboratory
Height of the hall:	7.30 meters
Is rigging possible?	Yes
Is rigging possible in areas with a lower ceiling?	No
Location of lower areas:	First part (1/3) of the hall on the left and right-hand side up to approximately 4 meters from the wall
Max. height beneath this lower area:	5.65 meters
Location of lower areas:	Second part (2/3) of the hall is on the left and right-hand side up to approximately 4 meters from the wall
Max. height beneath this lower area:	5.30 meters
Location of lower areas:	Third part (3/3) of the hall is on the left and right-hand side up to approximately 4 meters from the wall
Max. height beneath this lower area:	4.80 meters
Location of lower areas:	The front of the hall next to hall 10 up to approximately 4.5 meters from the wall
Max. height beneath this lower area:	4.00 meters
