

Trends in IT

Consequenties voor de infrastructuur.

EMC Hans Timmerman

EMC Federatie:

- EMC Informatie infrastructuur
- VMware
- RSA security
- Pivotal
- Information Intelligence

Techniek verdwijnt onder de motorkap

... en is steeds lastiger uit te leggen.

Virtualisatie is complexiteit in het kwadraat

Hardware wordt kleiner, capaciteit groeit . . .

1956 - 5 Mb Hard Disk van de IBM 305 RAMAC
Woog meer dan 1.000 Kg en had ongeveer de grootte van een piano

Hardware wordt kleiner, capaciteit groeit . . .

85 PETABYTES

SOLD INTO ONE WEB SCALE PROVIDER

20,772 HARD DRIVES

300 PALLETS

8 TRUCKS

EMC[®]

Hardware wordt kleiner, capaciteit groeit . . . 

How Big Are These Environments ?

550	Racks Of Equipment
4416	Physical Servers
5000	Virtual Machines
10000	OS Instances
200000	Disk Drives
890	Petabytes Of Raw Storage
10000000000	Monitoring Events Per Day
1000000000000000	Bits Of Network Capacity

Infrastructure Convergence Continuum

Build Your Own / DIY	Reference Architecture	Converged	VSA	Hypervisor Converged
VMware/HyperV + Servers + SAN/NAS	DIY based on reference document	Traditional Virtualization, but pre-integrated at factory	Virtualizes the Storage to run as a VM on the Hypervisor	Converges Hypervisor, Storage and Networking in single solution

What benefits has your organization realized by deploying integrated computing platforms? (Percent of respondents, N=99, multiple responses accepted)

Source: Enterprise Strategy Group, 2014.

A fast growing market

Top 3 Vendors, Worldwide Integrated Infrastructure, Q2 2014 (Revenues are in Millions)

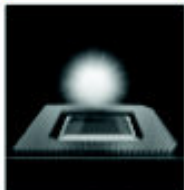

Vendor	2Q14 Revenue	2Q14 Market Share	2Q13 Revenue	2Q13 Market Share	2Q14/2Q13 Revenue Growth
1. VCE	\$328.6	24.3%	\$211.1	24.9%	55.7%
2. Cisco/NetApp	\$303.4	22.5%	\$219.5	25.9%	38.3%
3. EMC	\$239.1	17.7%	\$174.2	20.5%	37.3%
All Others	\$478.8	35.5%	\$243.5	28.7%	96.7%
Total Factory Value	\$1,350.0	100%	\$848.2	100%	59.2%

Source: IDC Worldwide Integrated Infrastructure & Platforms Tracker, September 25, 2014

Does your organization currently use any type of integrated computing platform? (Percent of respondents, N=303)

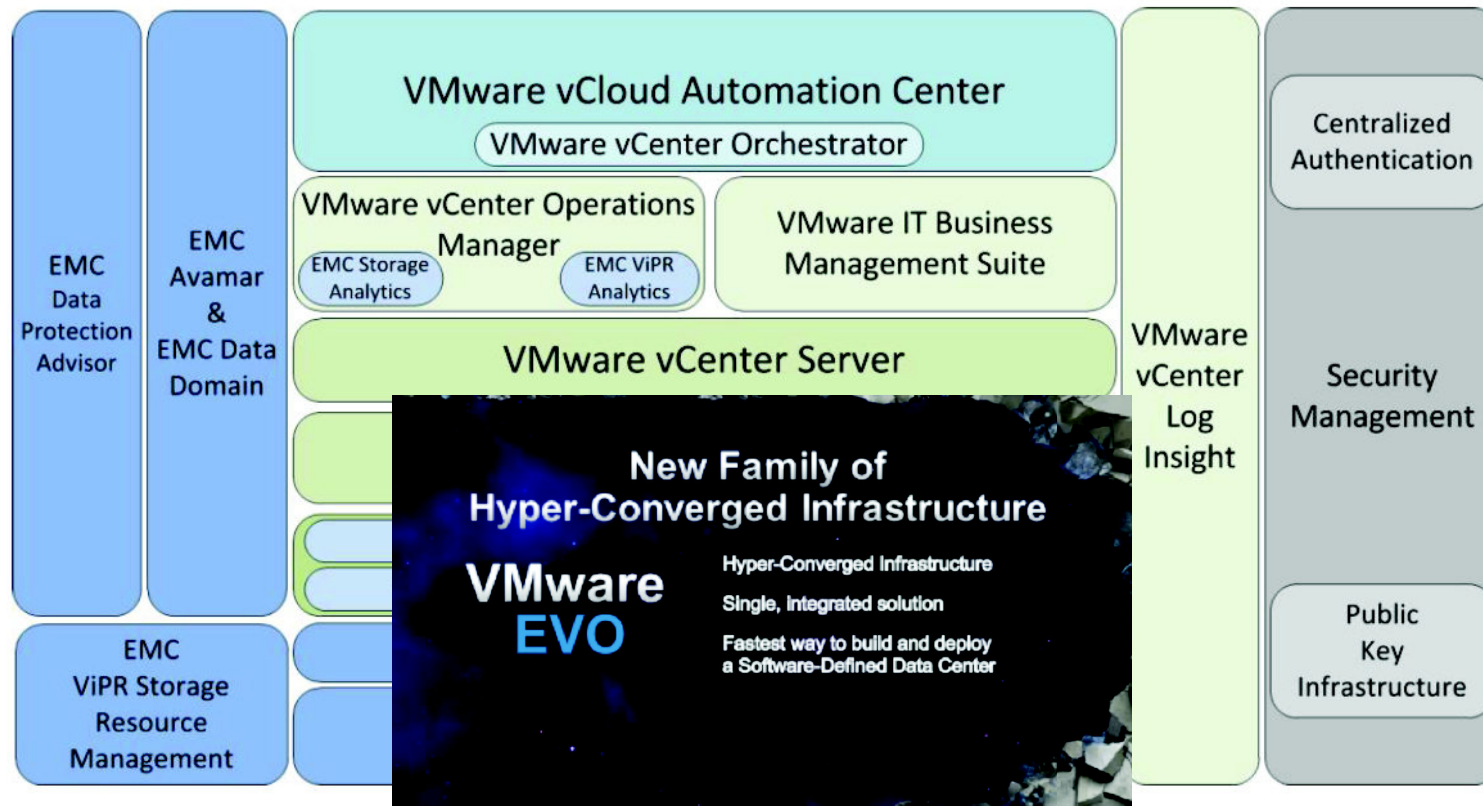

Converged Infrastructures are the new black

Converged Architectures			Hyper-converged Architectures			
Embedded	Integrated Best-of-Breed		Software-Defined BYO Commodity	Common Modular Building Block Appliances	Rack Scale	
	Integrated Stack	Integrated Infrastructure			Integrated Rack Scale	Common Rackscale Building Blocks
						
Strengths	<ul style="list-style-type: none">• Best way to deploy additional storage services	<ul style="list-style-type: none">• Fastest time-to-value at the application level• Well suited and broad support for P2 workload requirements• Proven, mature	<ul style="list-style-type: none">• Flexibility of any hardware choice.	<ul style="list-style-type: none">• Start very small• Simple support model• Unbeatable simplicity	<ul style="list-style-type: none">• Well suited for general scale SP, SaaS P3 workloads• Flexible• Simple Support Model	<ul style="list-style-type: none">• Supports specialized, high-end P3 workloads due to custom HW• Simple support model
Weakness	<ul style="list-style-type: none">• Poor economics for general purpose workload use	<ul style="list-style-type: none">• Application Silo• High "Step In" Cost.• Premium economic scaling factors	<ul style="list-style-type: none">• "Non-predictable outcome"• Non-integrated acquisition and support model	<ul style="list-style-type: none">• Poor economic scaling past ~1000 VMs• Rigidity for datacenter use cases	<ul style="list-style-type: none">• Poor support for legacy workload SLAs and infrastructure expectations.	<ul style="list-style-type: none">• Poor support for legacy workload SLAs and infrastructure expectations.

Hardware becomes a commodity: standardized, common, cheap, simple

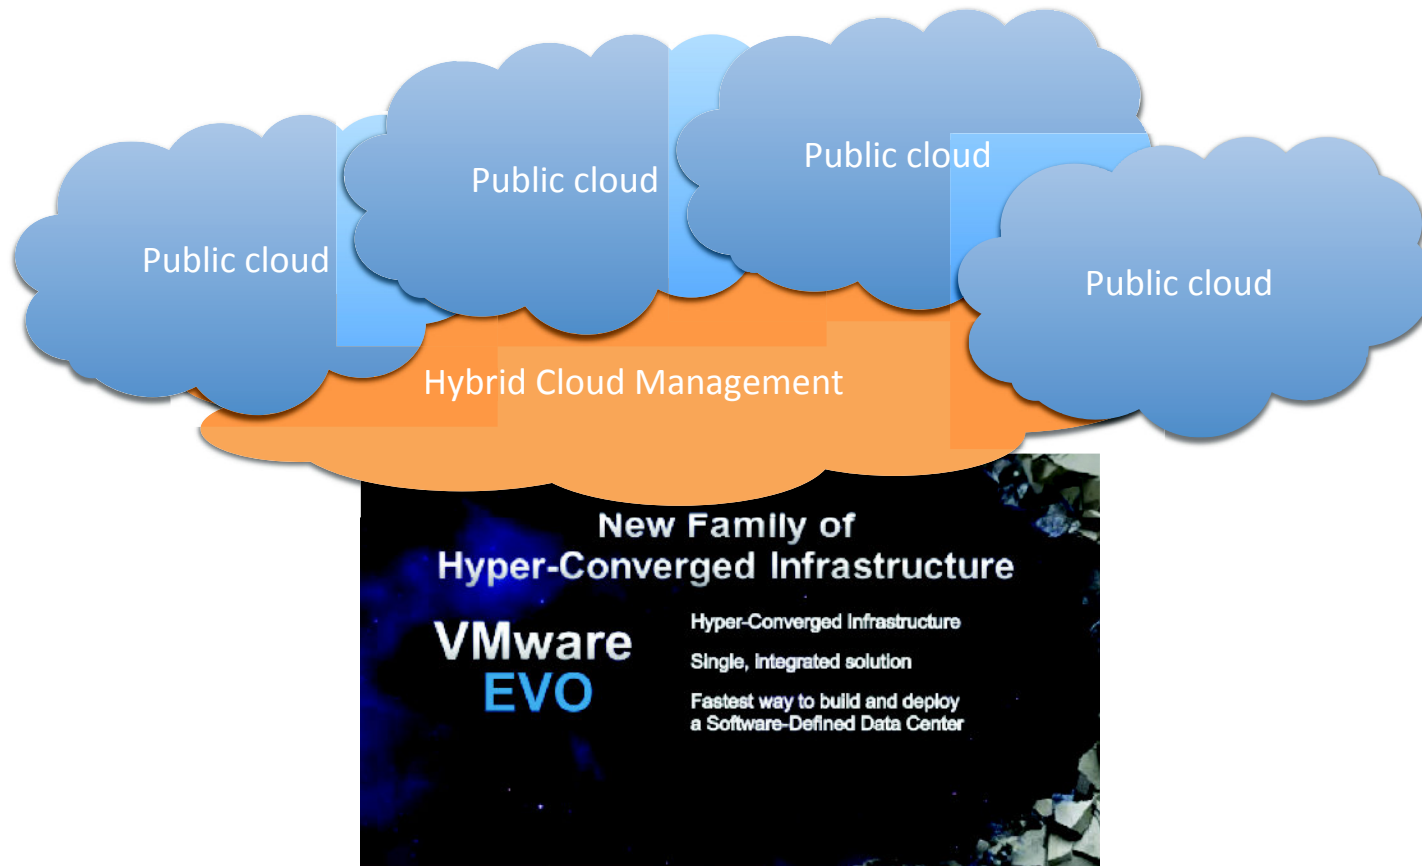

The intelligence is in the software

Next step is to modular micro private datacenters based upon private cloud architectures

EMC's Federation view: a private cloud as one integrated software stack

The Data Driven Society

“Water water everywhere, but nary a drop to drink.”

- The Rime of the Ancient Mariner

In the world of data:

“Data, data everywhere, but nary a bit to use.”

The digital universe (40 ZB by 2020) holds potential analytic value:

Only 0.4% of the digital universe is actually being analyzed.

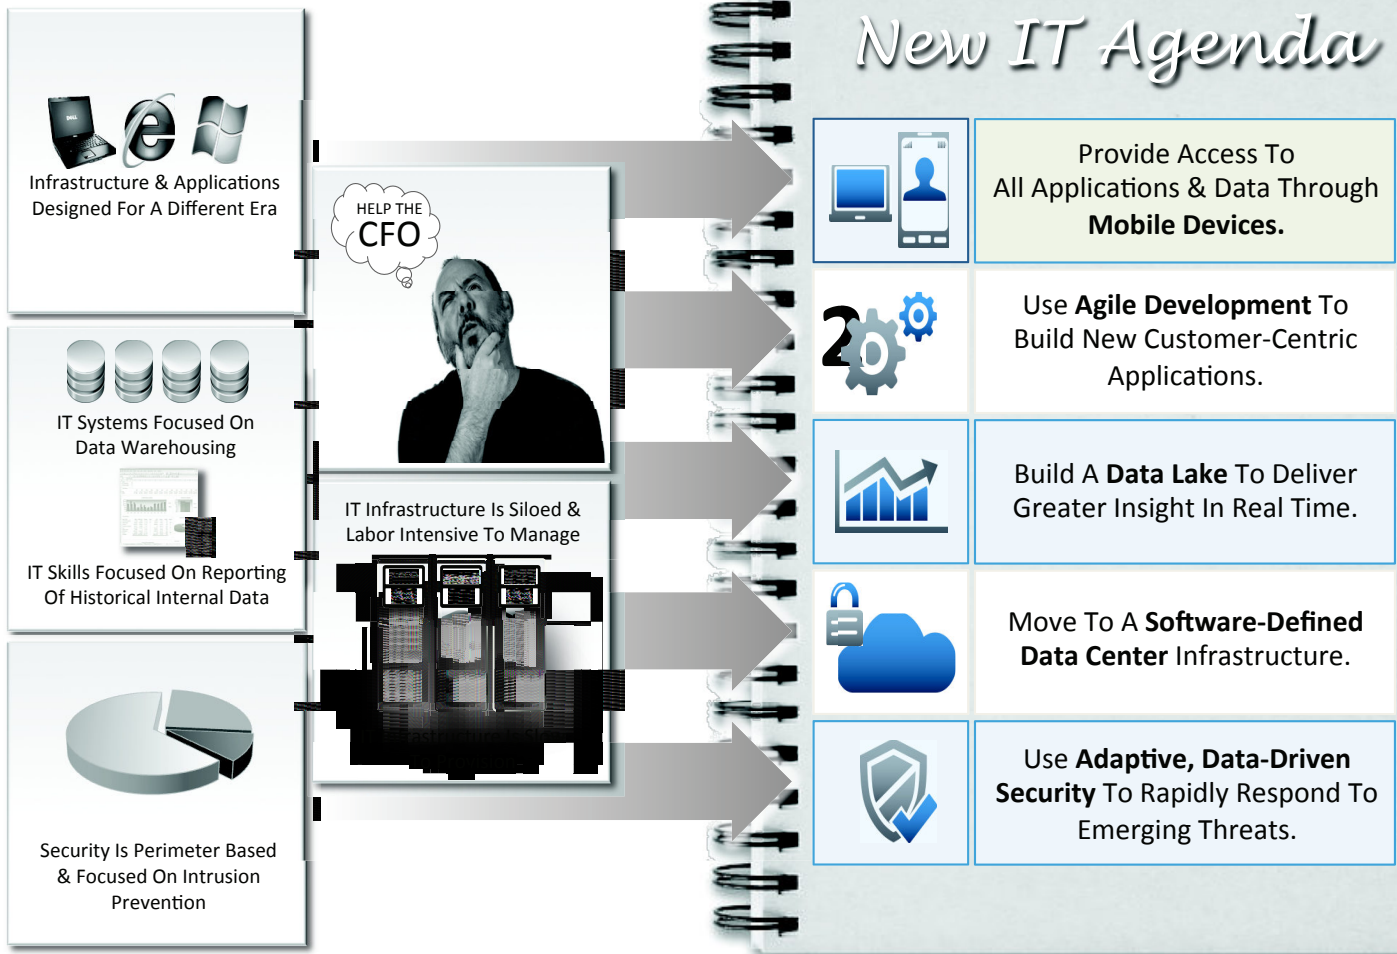

Data is the new oil and creates a market of \$17 billion in 2015

Return on Data (ROD) will be the new ROI.

How prepared are CIO's to manage that whopping

40 trillion gigabytes of valuable data in 2020?

Today's Reality: Stuck in Silos

Traditional Apps

Vs.

Cloud-Native Apps

IT

Vs.

Developers

On-Premise

Vs.

Off-Premise

Safe, Secure,
and Compliant

Vs.

Instant, Elastic,
and Self-Service

The new Reality:

The Power of “AND”

Traditional Apps	&	Cloud-Native Apps
IT	&	Developers
On-Premise	&	Off-Premise
Safe, Secure, and Compliant	&	Instant, Elastic, and Self-Service

A Story of Two Clouds

Pattern: Scale-out, not UP

Scale Up: (Virtual*)
Servers are like pets

You name them
and when they get
sick, you nurse
them back to
health

garfield.company.com

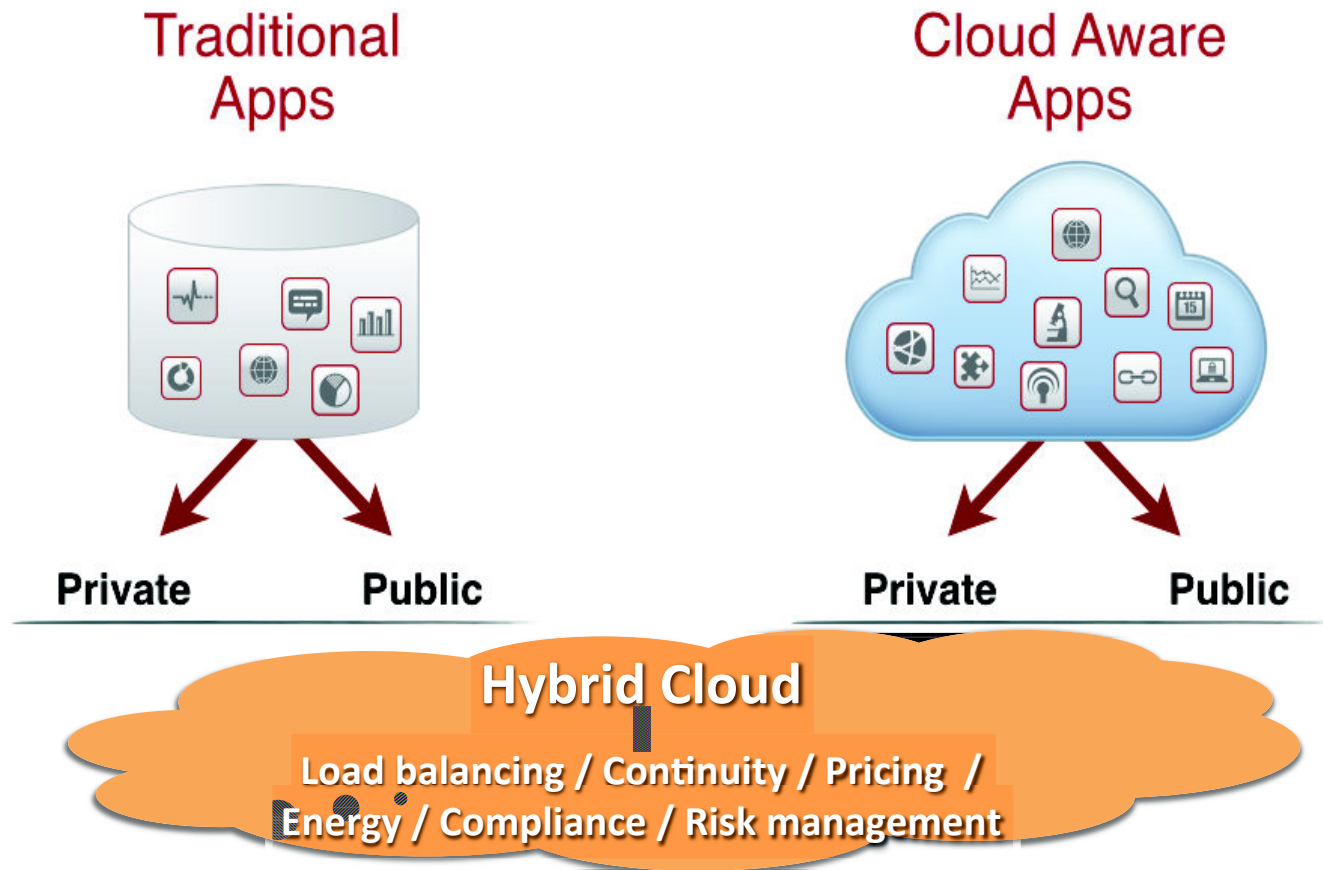

Scale Out: (Virtual*)
Servers are like cattle

You number them
and when they get
sick, you shoot
them

web001.company.com

Portfolio of IT Infrastructure

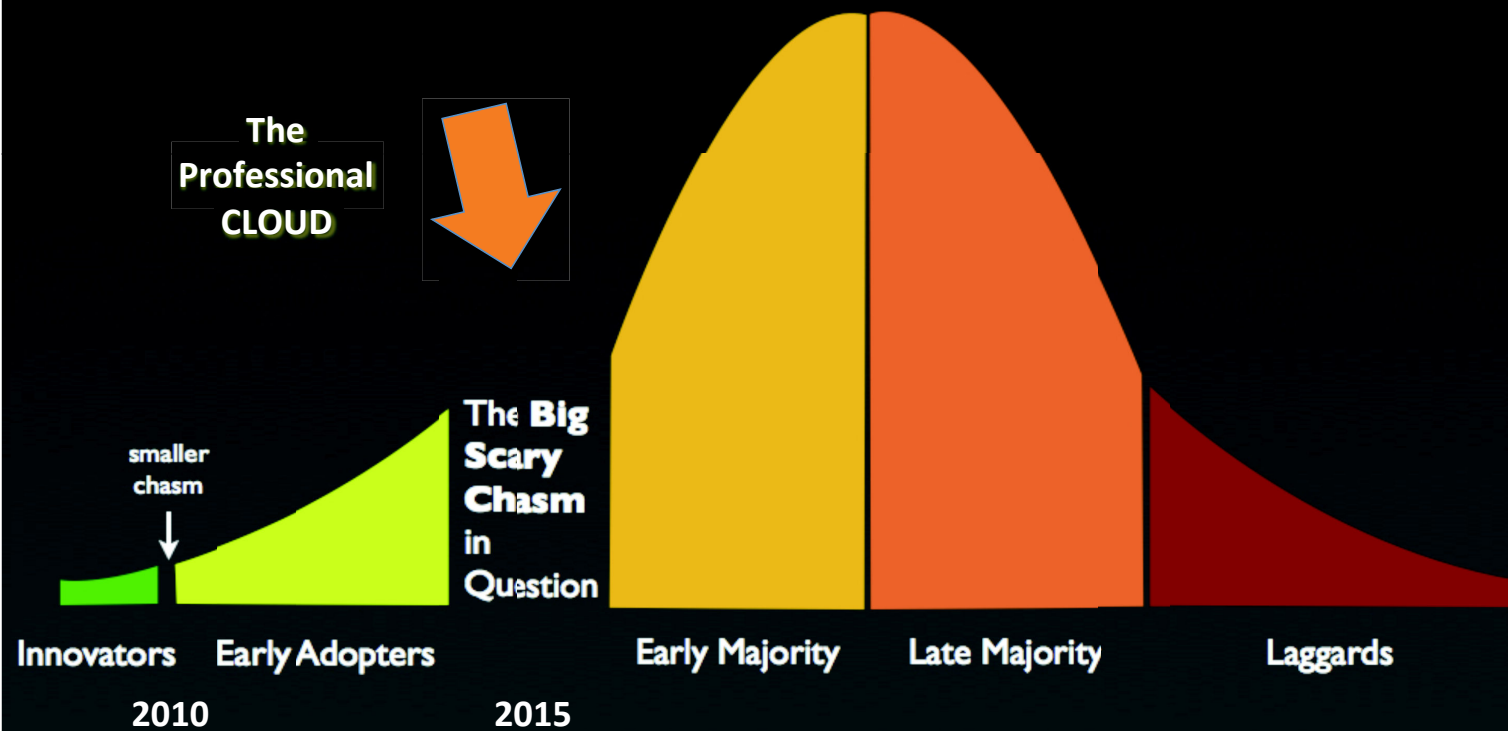

The Path to the Software-Defined Enterprise

Crossing the Chasm

Geoffrey Moore - 1991

Conclusion:

- **#1 Hyperconverged Infrastructures**
- **#2 The Power of AND (rather than OR)**
- **#3 Software defines (also) the Data Center**
- **#4 Combination of Private and Public Clouds**
- **#5 Hybrid moving to “professional” stage**
