# Why should DC Customers Care ?

Application performance and support is the end goal

- **Customers should choose the test limit that provides guarantees for the applications they plan to use in the datacenter.**

COMMSCOPE®

16 november 2023 | 's-Hertogenbosch

[www.fhi.nl/ITINFRA](http://www.fhi.nl/ITINFRA)

# Why should DC Customers Care ?

Application performance and support is the end goal

- If the end goal is to support **customer applications**, then they should utilize a manufacturer that actually guarantees those applications.
- While using **industry standards** as a **baseline** might work in some instances, it will not guarantee the support of their applications
- **CommScope's 25-year performance and application Assurance Warranty** takes a holistic approach to design, model, validate, build, install and test. This ensures optimum application support for both **current** and **future applications**.
