SOFTWARE is **EATING THE WORLD**

Exponential technologies are driving wave after wave of exponential innovation

Unprecedented improvements in the 3 core digital technologies

- cost/million transactions from \$222 to \$ 0.06
- cost/gigabyte of storage from \$999 to \$ 0.03
- cost/megabyte per second from \$1245 to \$23

Interactions with other technology domains amplify disruptive power

- dynamic ecosystems
- open platforms

Moving across industries and blurring boundaries

Where to start?

- Realize that advances in core digital technologies is reshaping the nature of competition.
- Integrate your innovation processes with customers and dynamic ecosystems to enable shorter product release cycles.
- Reorganize teams around learning and performance improvement.

**‘A Revolution doesn’t happen
when society adopts new tools**

**It happens when society
adopts new behaviour’**

Clay Shirky

Ingram Pinn

PHOTO FINISH

2015:

the world's largest taxi company owns no vehicles

The Facebook logo, featuring the word 'facebook' in white, lowercase, sans-serif font on a dark blue rectangular background.

facebook®

the world's most popular media owner creates no content

the most valuable retailer has no inventory

the world's largest accommodation provider owns no real estate.

Internet of Things

- › The Internet of Things (IoT) is a computing concept that describes a future where everyday physical objects will be connected to the Internet and be able to identify themselves to other devices.
- › The IoT is significant because an object that can represent itself digitally becomes something

greater than the object by itself. No longer does the object relate just to you, but is now connected to surrounding objects and database data. When many objects act in unison, they are known as having "ambient intelligence."

Internet of Things: next phase of the .net

Rob Chandhok (Qualcomm):

We're going to a world where we connect trillions of sensors. They connect to each other and bring intelligence to us as human beings through the .net.

your time2market.

Industry has to decide if standards are coming. To

Industrial Internet of Things: 80% of total IoT

Industrial Internet of Things: Keys to Success

1. Balanced Strategy: Focus on Growth & Operational Efficiency
2. Anticipate the Shift from Product to Service
3. Rethink your Partner Ecosystem
4. Focus on your IIoT Workforce

Paul Daugherty (Accenture):

- #IIoT: Connected Equipment, Connected Vehicles, Life Safety, Connected Energy, Connected Health
- Mastering #IIoT: Operational Technology higher spend than Information Technology, IIoT will bring them together.
- Pace & Speed is most important to create and deliver success

Accenture estimates the
Industrial Internet of Things
could add \$14.2 trillion to the
global economy by 2030

Sensors

- * Low energy
- * Miniaturization
- * Reduced costs
- * GPS

Wireless Connectivity

- * High bandwidth
- * Open standards
- * Reduced costs
- * Smartphone as interface and datahub

Data processing and analysis

- * Increasing computing power, memory and data storage
- * Cloud service access
- * Reduced costs
