Predictive maintenance application demonstration

Connection to the plant management level

- ✓ Automated generation of maintenance orders based on the data analyses
- ✓ Confirmation of maintenance orders in SAP

Connection to the control level

- ✓ Receiving process data from the control level
- ✓ Automated reporting of errors back to the control system in order to effect suitable actions (e.g. stop the plant)

- ✓ Modular design based on Docker containers
- ✓ Extensibility of the system with new ML models
- ✓ Transferability of the system to other plants

Predictive maintenance application demonstration

Device- / application management demonstration

More than 75% of large organizations will be using containers productively in 2024, up from 35% this year (Gartner 2020)

Device- / application management demonstration
