

Abstract submission open for iMNC21 on December 2-3 2021

MinacNed will host the 17th edition of the international MicroNanoConference in the Jaarbeurs Utrecht on December 2 and 3, 2021. After a year and a half of mostly online webinars and meetings, we look forward to a live conference with you as our guest in Utrecht.

The program for iMNC21 is focussed on: **From science to market – Scale-up in nanotech**

The program includes sessions on Nano4Health, Nano4AgriFood, Manufacturing and Miniaturization themes, and a session on the organizational and technical challenges of scale-ups.

Poster presentation

Young scientists are invited to submit an abstract for an oral or poster presentation. In the conference program you will find poster sessions where you can discuss your poster with attendees.

On December 2, a **Poster Pitch session** is planned to give attendees a quick overview of your abstract in a 3 minute pitch. All posters can be submitted under the main themes of the conference. All posters will be placed in **Portrait style**.

Networking and career opportunities

On December 3, a special session will be organized '**Life after PhD**', with inspiring talks from speakers who discuss their own career path and give you the opportunity to ask your questions direct.

Also on the conference floor, company exhibitors will present their research and development and you will be able to discuss career opportunities at both large companies and startup companies in the micro- and nano technology field. As a participant of iMNC21 you can join the B2Match networking program. This platform is hosted by the Europe Enterprise Network and allows you to schedule 1-to-1 meetings with other participants at the conference and online with contacts from science and industry from all over Europe.

Tickets for students and PhD

Only registered attendees can present a poster or oral presentation at iMNC21. For students and PhD a fixed rate applies of 225,- Euro (ex VAT) including social evening program.
