

Design & Embedded

Embedded Systems

Architecture, software, operating systems

Electronics Design

PCB layout, design service, design tools, ic design

Product Design

Electronics Components

Active Components

Semiconductors, memory processors, analogue logics

Electromechanic Components

Connectors, transformers, printed circuitboards, enclosures

Passive Components

Resistors, relays, casings, displays, opto electronic

Communication Components

Cable, buses, wireless

Data Acquisition

Systems, boards, hardware and software

Remote Control Systems

Industrial computers, processor boards, operating software

Power Electronics

Power supplies, thyristors

Electronics Production

Production Tools

ESD, tools

Production Service

Engineering, assembly, functional testing

Production Equipment

Pick & place machines, soldering equipment

Cleanroom Equipment

Test & Measurement

General Purpose Measuring & Testing Equipment

Signal generators, multimeters

Handheld Testers

Gas detection, temperature, humidity, turbidity

Communication Testing Equipment

Optical fibre, protocol analysers, signal analysis

Electrical Testing

Scopes, analysers, EMC Test testing for printed circuit boards (in-circuit, functional, AOI, S-Ray)

Mechanical Testing

Vibration tables, shakers, tensile testers, compression testers

Climate Testing

Clean rooms, climate chambers

Calibration & Validation

Test & simulation software, services

Test Automation, Testing Service

Sensor Technology

Sensor components, intelligent sensor systems, sensor products, sensor design and engineering service, sensor networks
