**We provide confidence
for visionary engineers**

ABOUT ALTHEN INDUSTRIAL IoT

The right sensor and measurement solution for your application

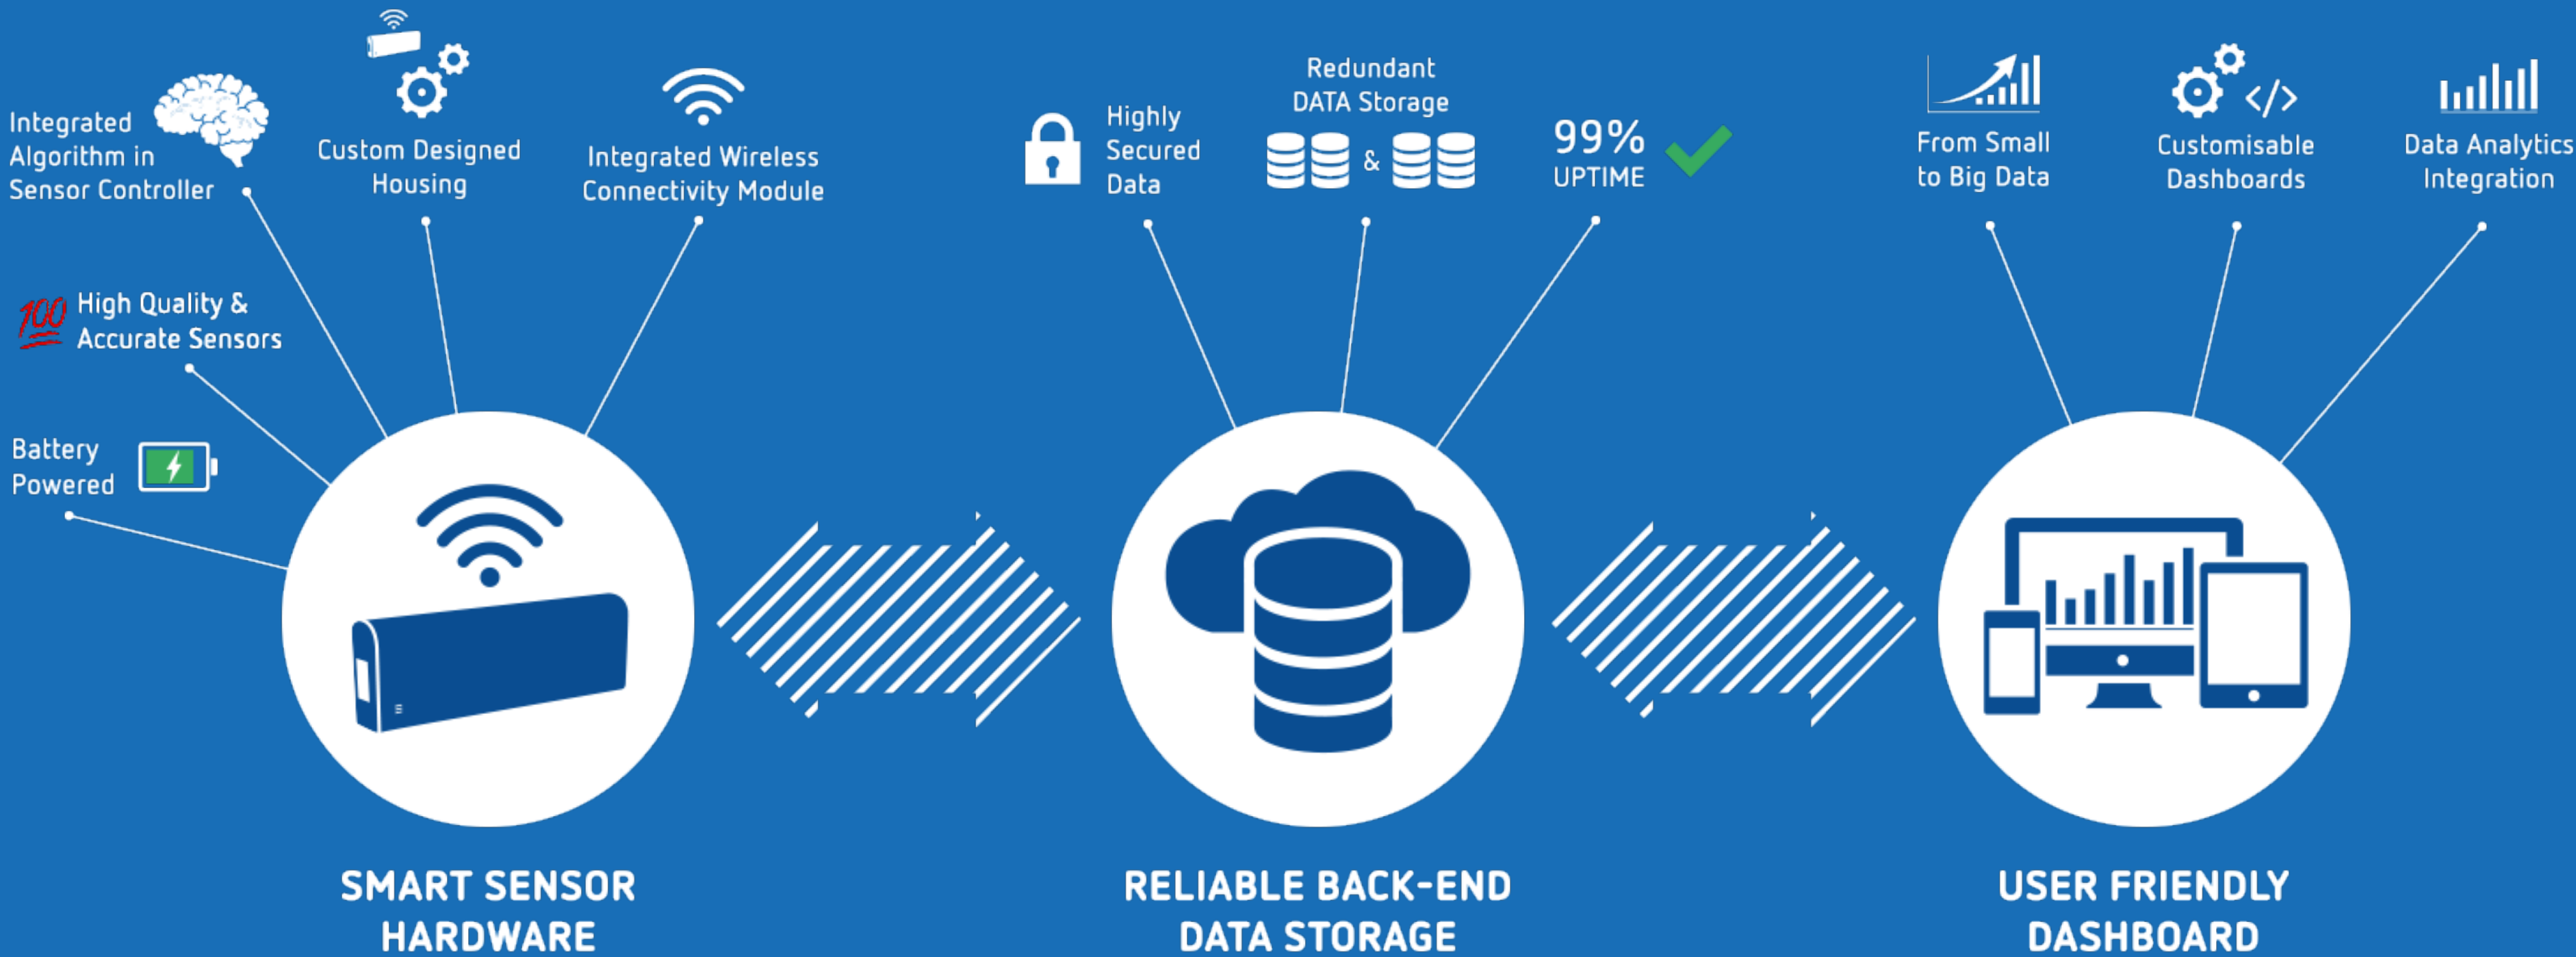

FOR MORE THAN 40 YEARS ALTHEN SENSORS & CONTROLS IS STANDING FOR PIONEERING MEASUREMENT AND SENSOR SOLUTIONS.

Our in-house production and design department, customer-specific sensors and measurement systems are created for almost all applications in many different industries. Our experienced specialists advise you professionally and with all necessary details needed.

YOUR BENEFITS

- Industry specific knowledge about requirements and certifications
- Development of customized sensors (also for low volumes)
- Experience with OEM development trajectories
- Lean project management for T&M applications

YOUR END-TO-END INDUSTRIAL IOT SOLUTION PARTNER

▪ Reaping the benefits!

INDUSTRIAL IOT CONCEPTS

Example: Kademonitoring

IIoT Example: Slimme Bakstenen

We believe in your dreams. Together we build the future.

SMARTBRICK FOR PREVENTING COLLAPSING QUAYS IN THE MUNICIPALITY OF AMSTERDAM

PROBLEM:

- The beautiful quays of the City of Amsterdam are in trouble: structurally, they are at their end-of-life.
- Collapse of the quays is increasingly occurring.
- There is no way to renovate fast enough or monitor the quay walls.

Current cost of inspection	Current solution
.... million	not scalable

OUR SOLUTION:

This smart brick is a low-cost, high-tech, stick-and-play monitoring device that can monitor structural health, preventing future quay wall collapse.

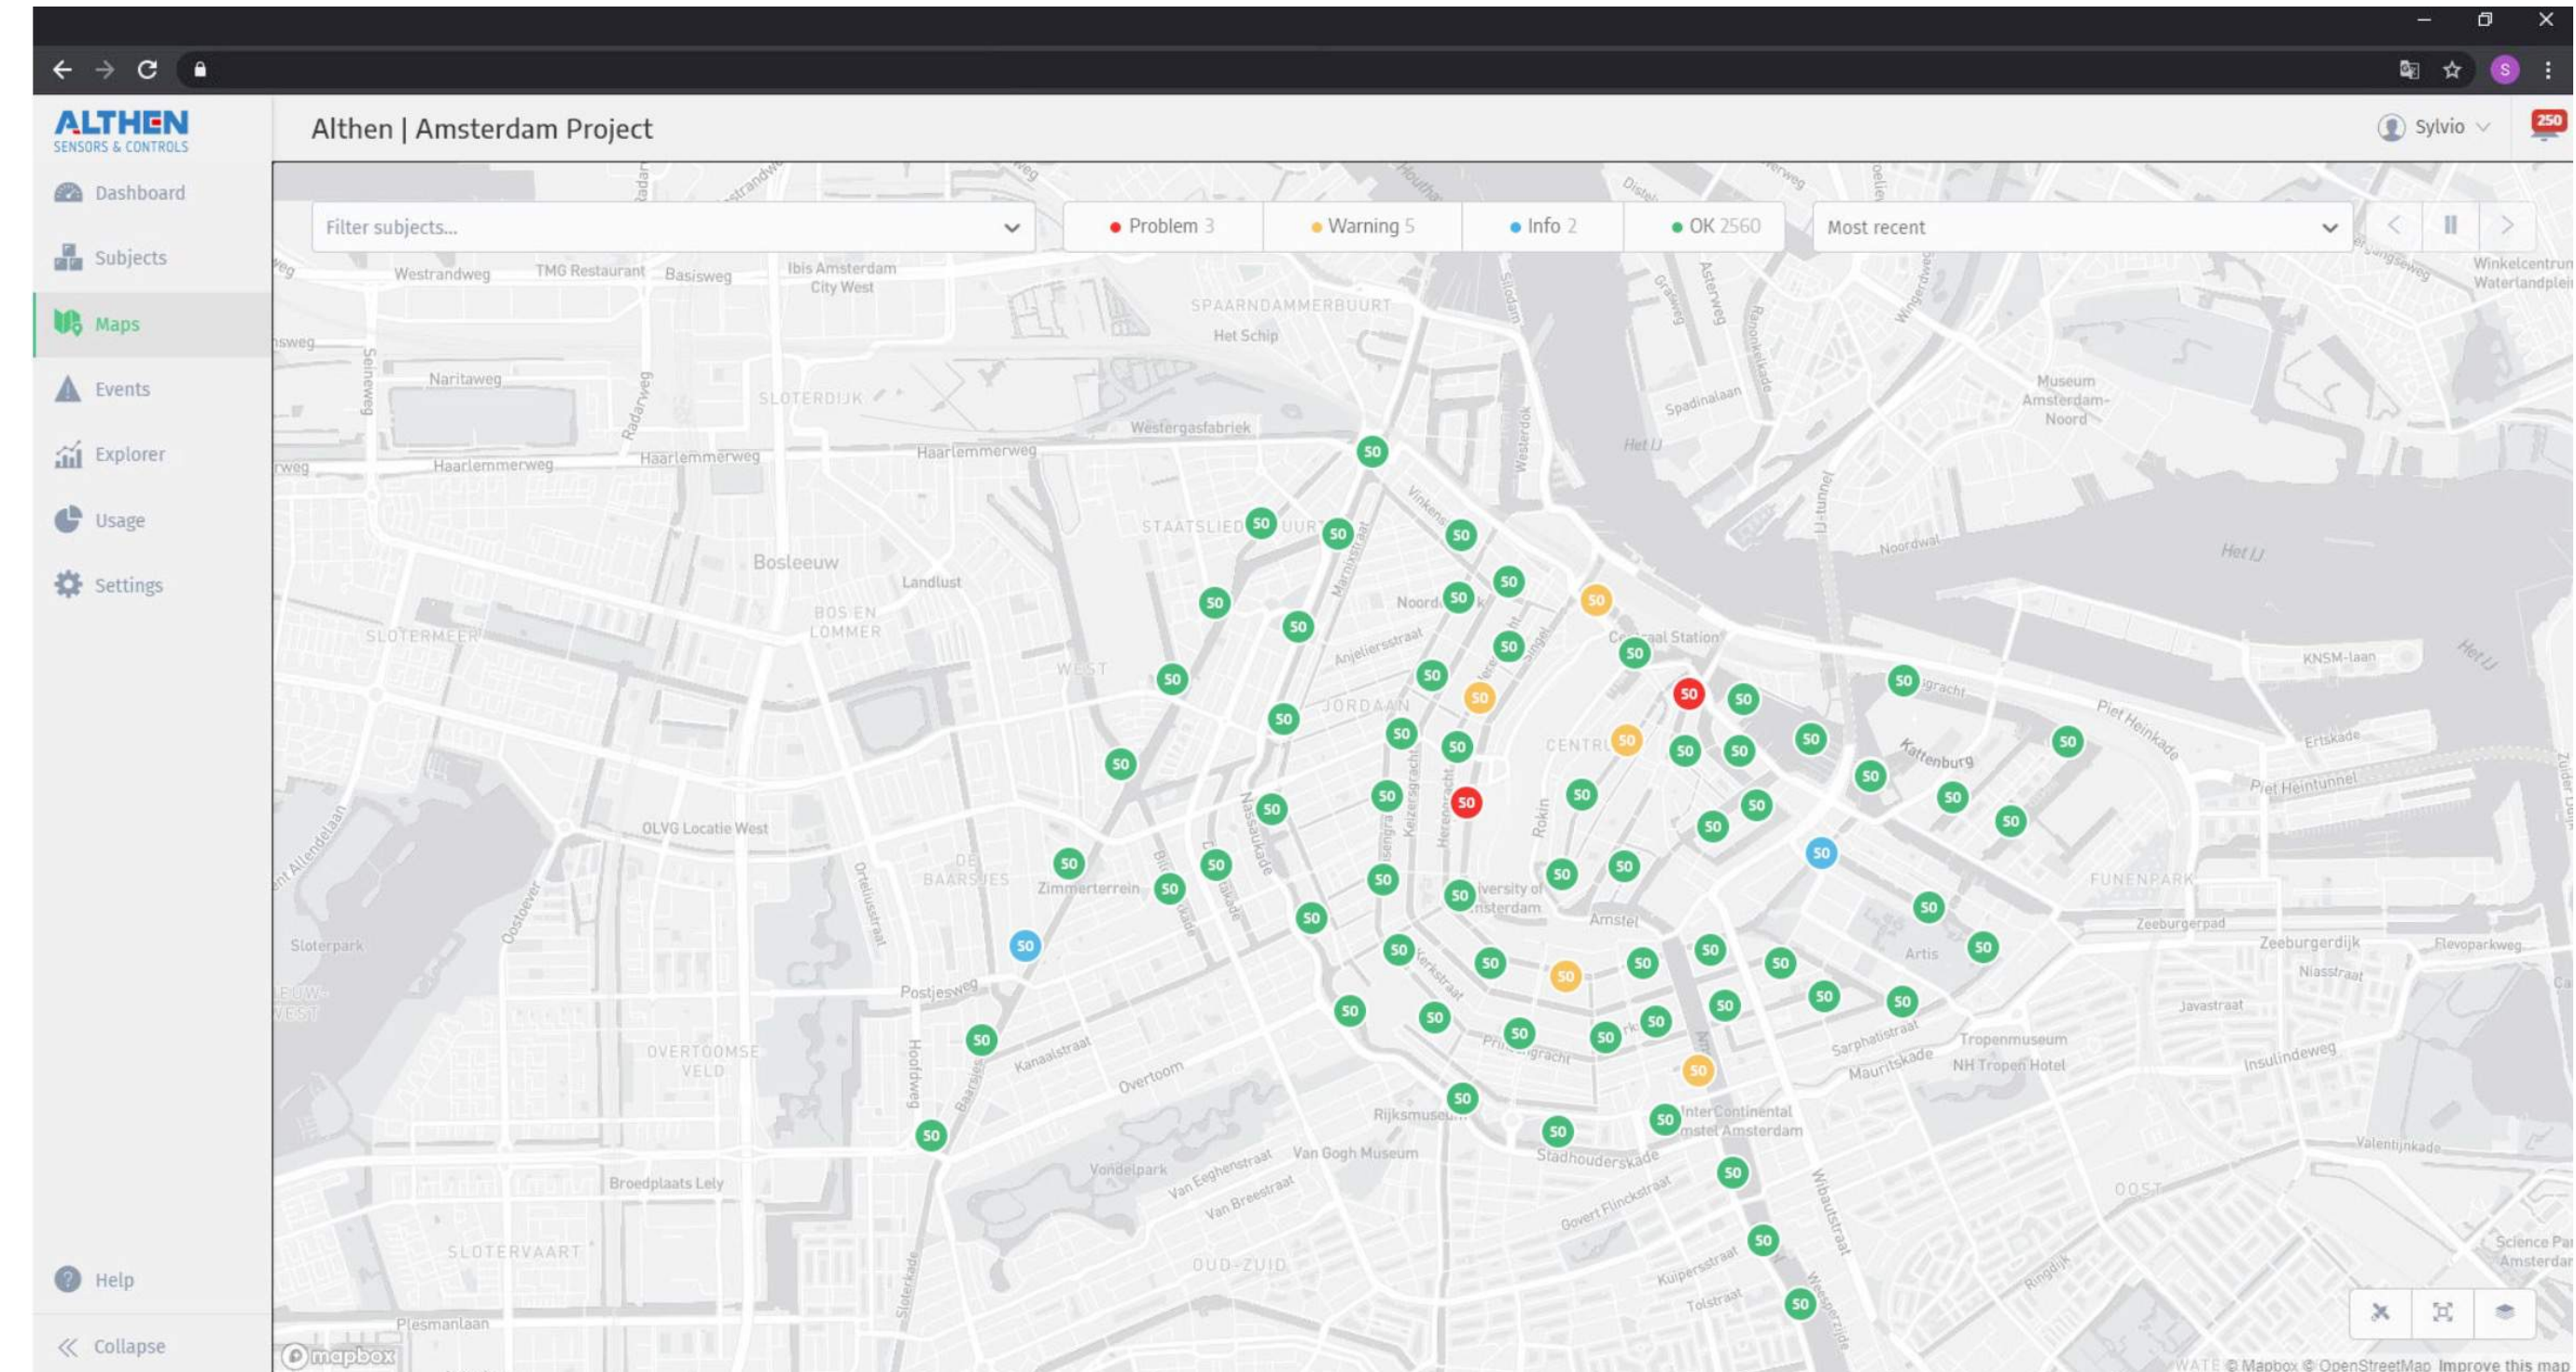

IIoT Example: Slimme Bakstenen

We believe in your dreams. Together we build the future.

This is a novel low-cost, high-tech IoT inclination sensor:

- Measures inclination at 0.1 degree accuracy
- 5 year lifetime – Battery powered
- Telecom connections – No gateway needed
- QR-code for identification & start monitoring

Stick&Play: Record 30-seconds installation time

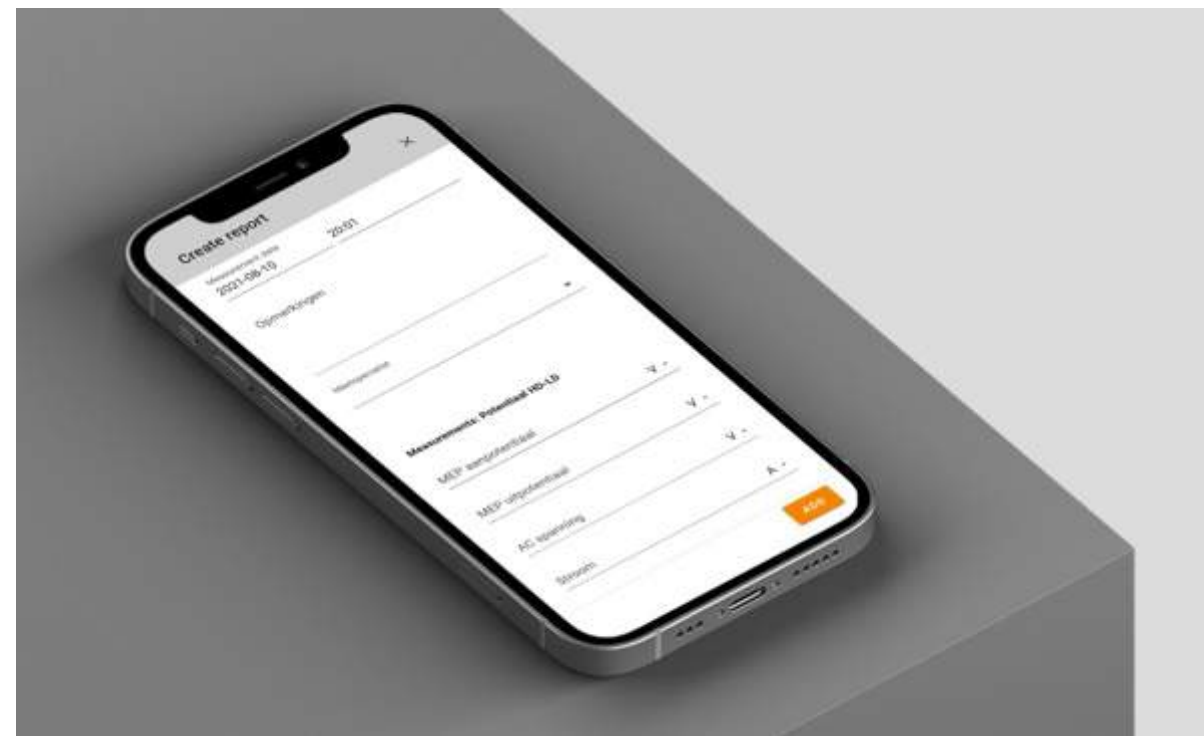

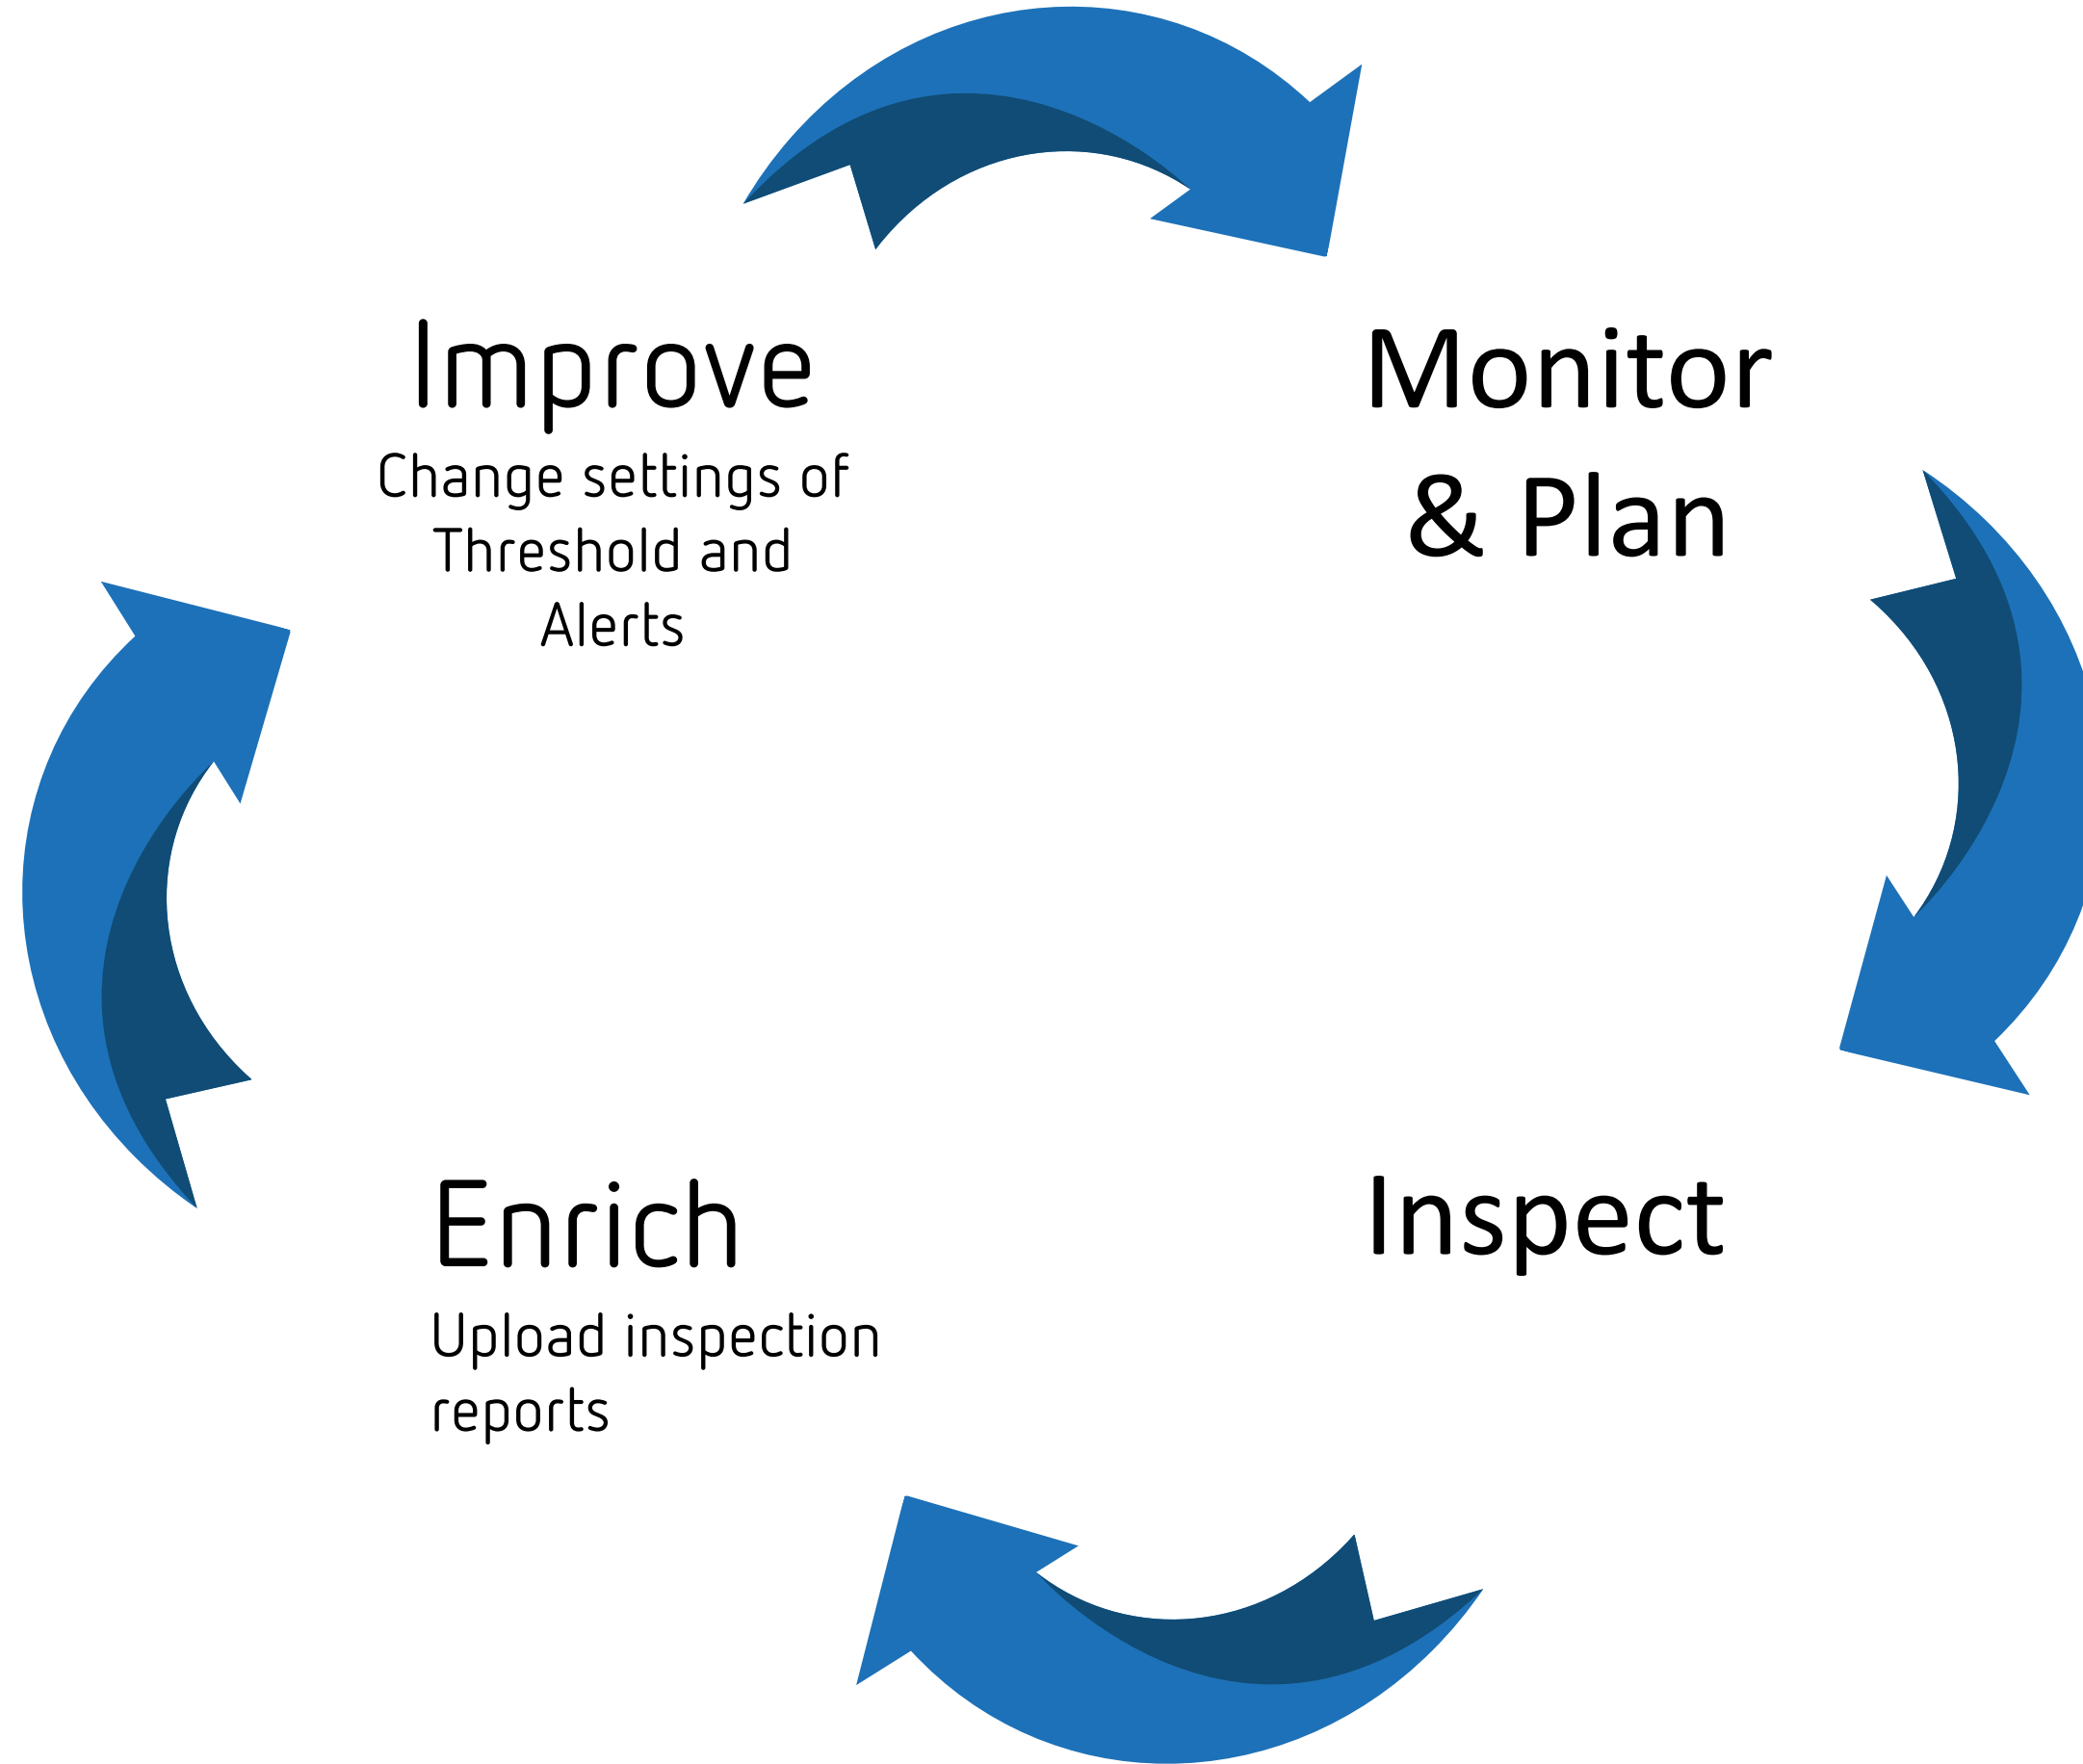

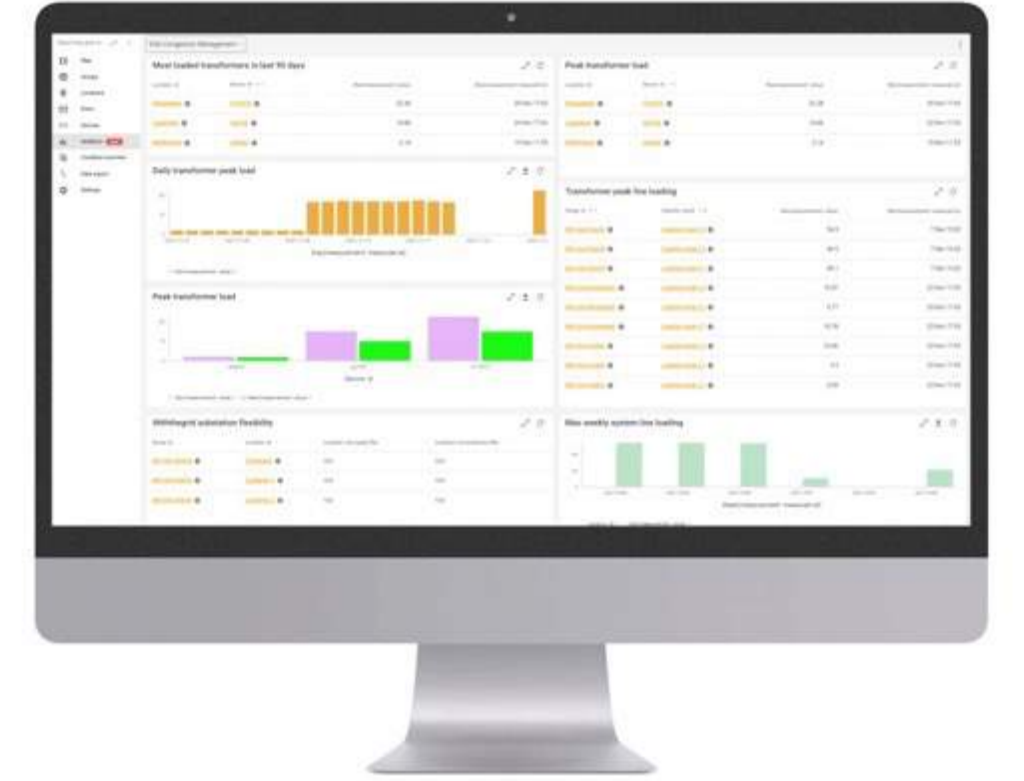

MONITORING VIA INTUITIVE IOT PLATFORM:

- Low-code platform provides notifications based on user input
- Easy API

Continuous Improvement

The right sensor and measurement solution for your application

INDUSTRIAL IOT VOORBEEDEN

Condition Monitoring

IIoT Example: Wireless Condition Monitoring

We believe in your dreams. Together we build the future.

PREVENT PRODUCTION BREAKS
BY MONITORING ALL MACHINES

FOR DEMANDING INDUSTRIAL
CONDITIONS

EASY AND COST-EFFICIENT
WIRELESS DEPLOYMENT

IIoT Example: Condition Monitoring

We believe in your dreams. Together we build the future.

Trend revealer

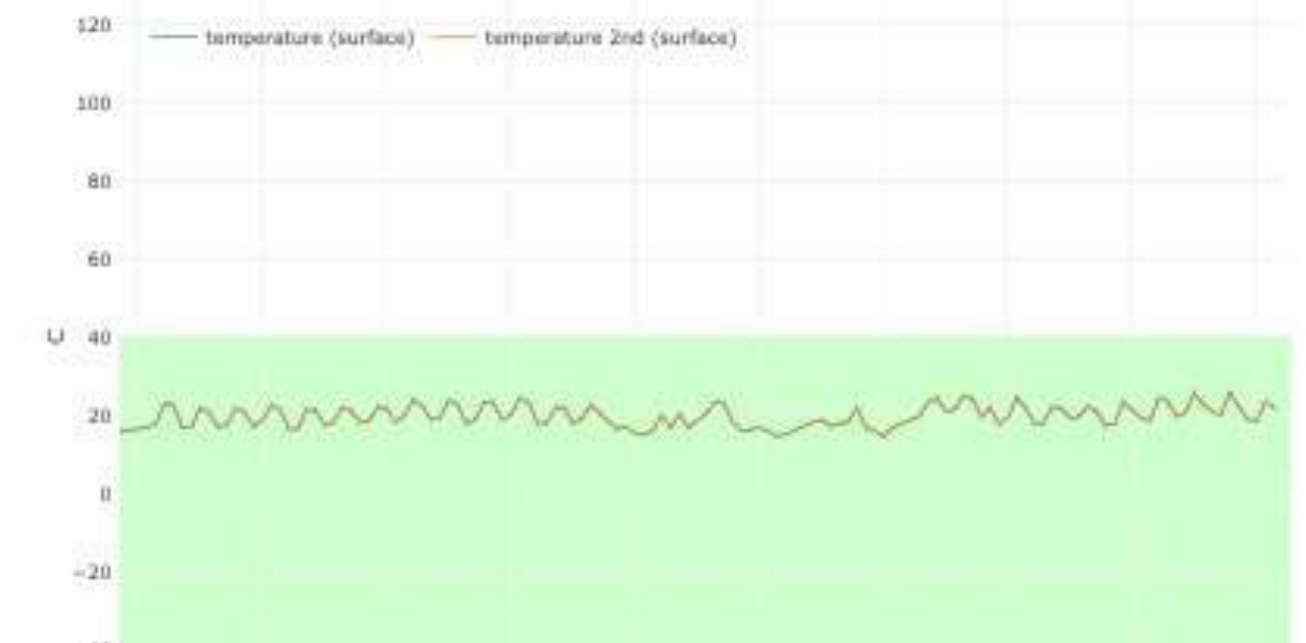

Status info

Velocity 10-1000Hz RMS

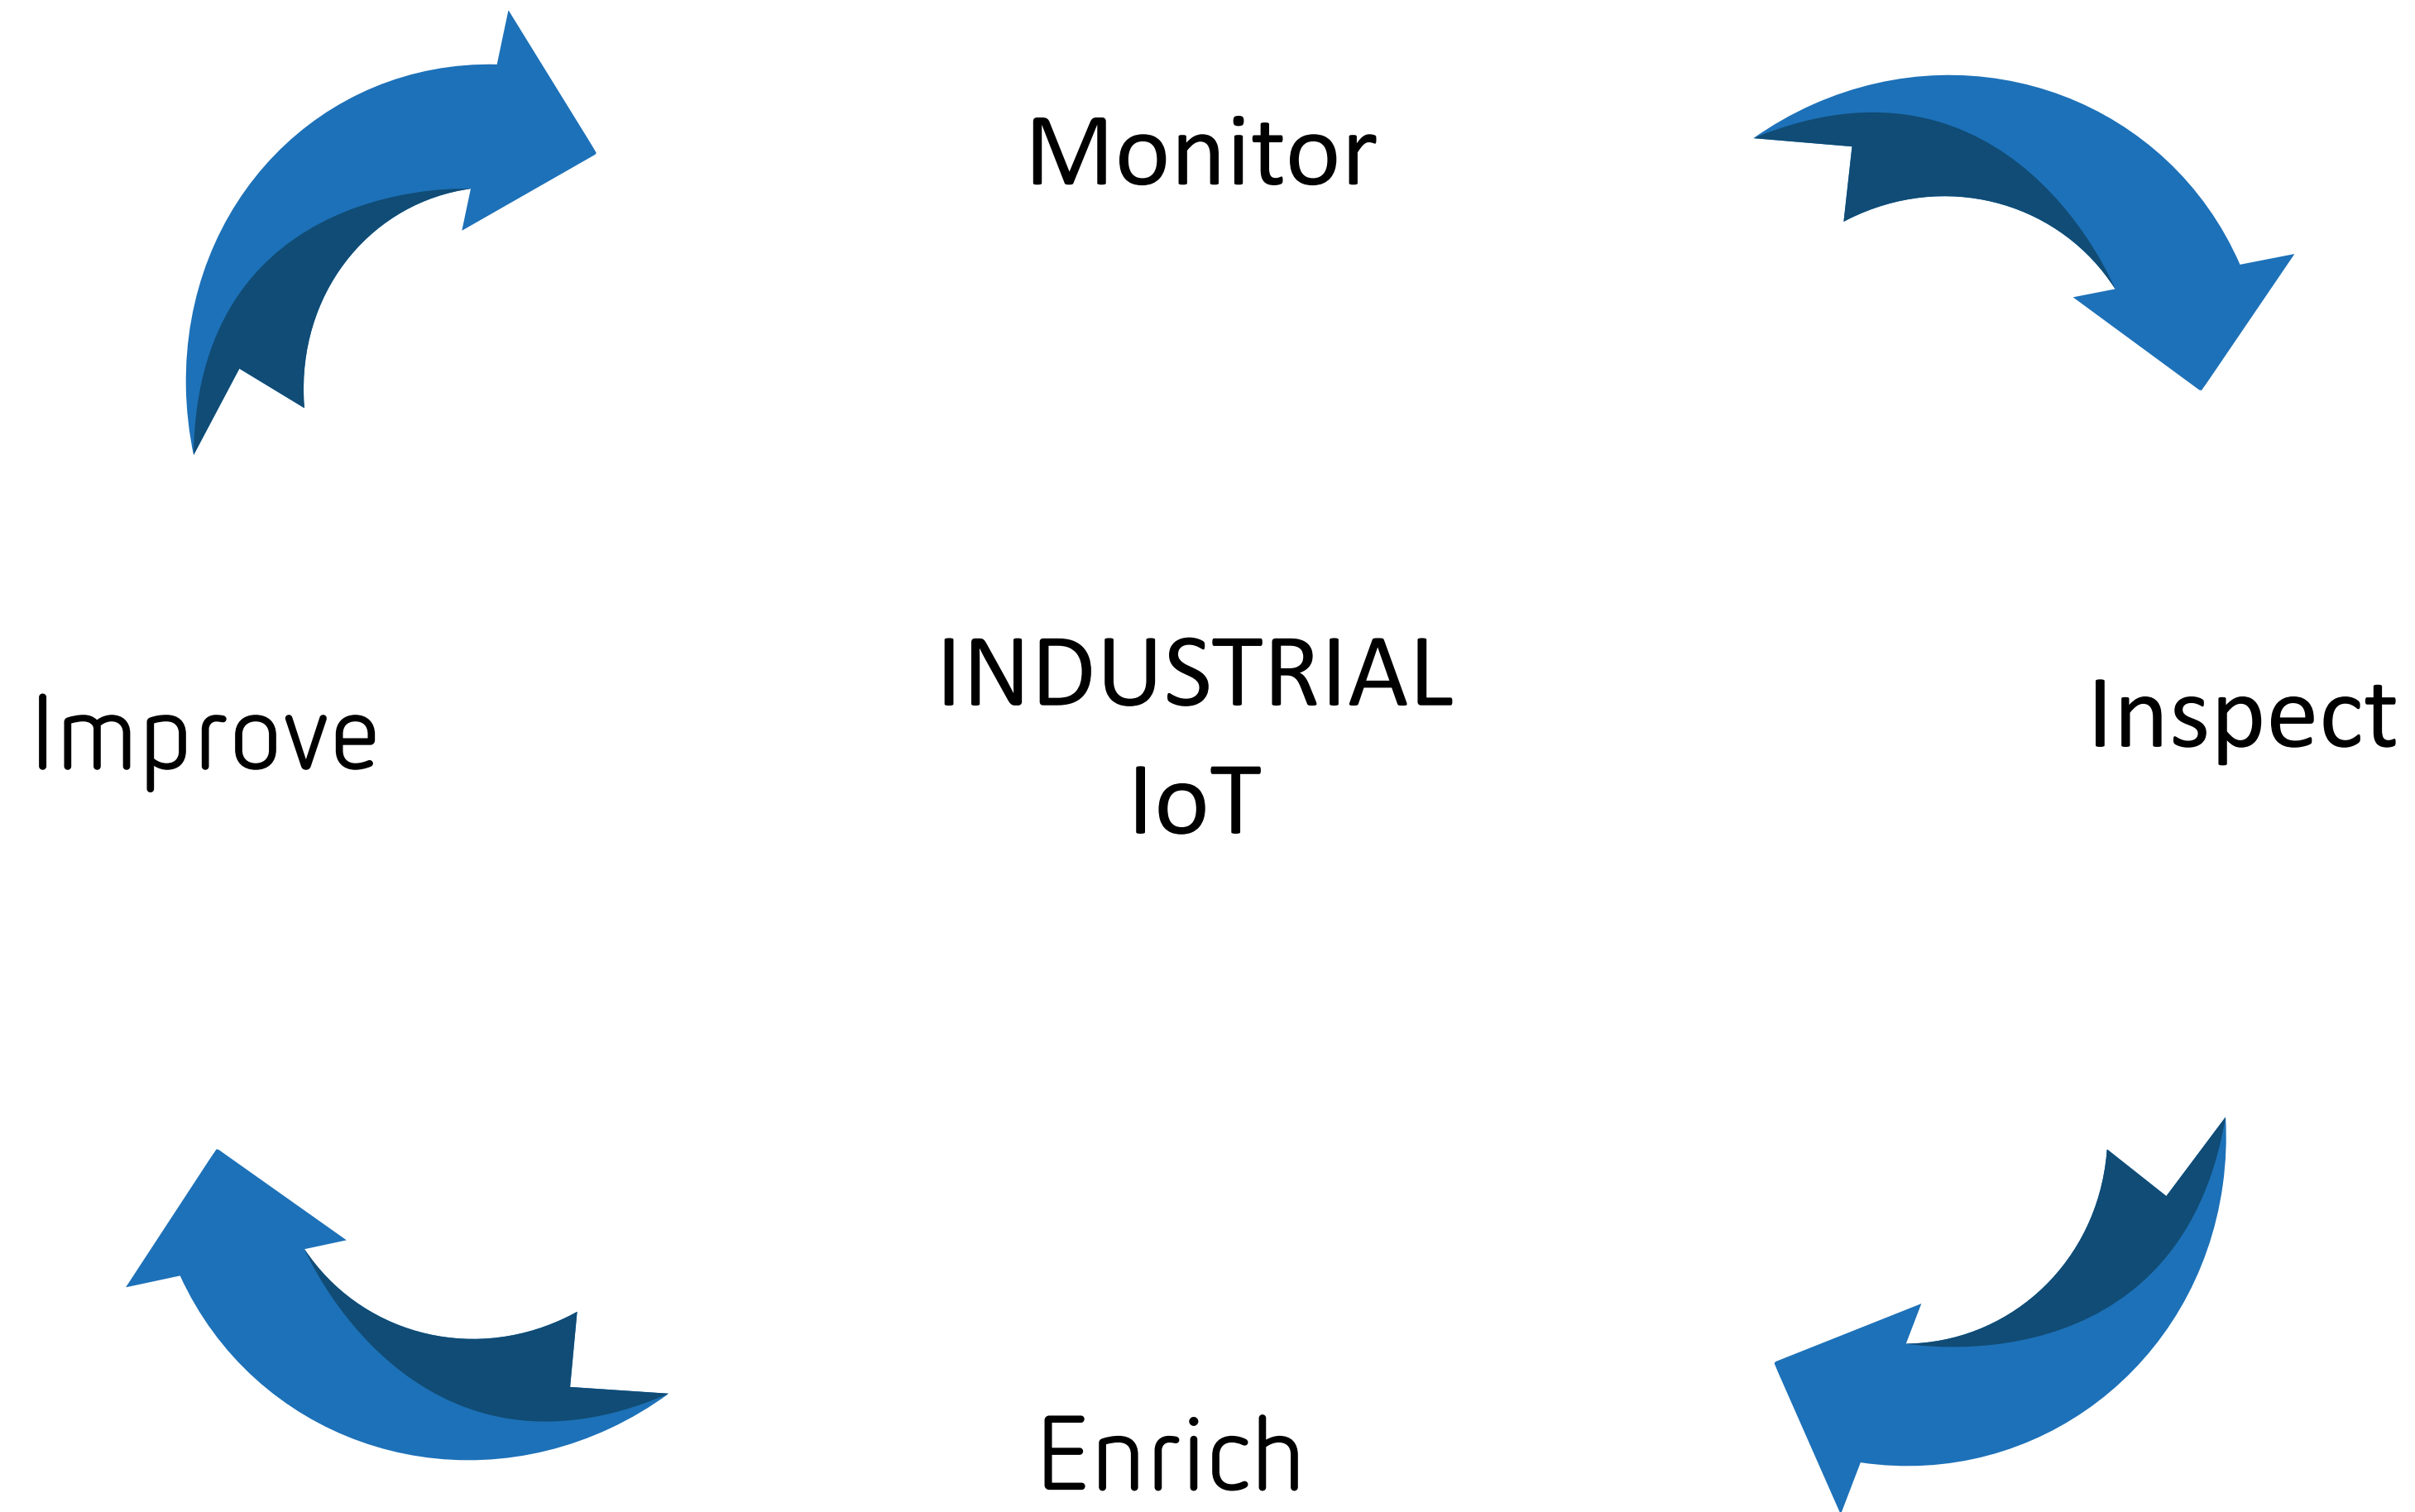

Temperature

Making sure your business runs with an optimized Asset Management Process

The right sensor and measurement solution for your application

With Condition Monitoring, a lot can be saved!

We believe in your dreams. Together we build the future.

Example case study:

Company "ProSteam" supplies steam to textile companies.

A critical blower needs scheduled maintenance on its bearings.

This typically takes 2 days.

During those 2 days a backup steam generator system is used, which consumes €20,000 of fuel oil per day.

The Wireless Condition Monitoring System was installed here.

By viewing the vibration data in advance, it was possible to determine much more accurately which bearing required maintenance.

As a result the planned maintenance could be reduced to 1 day.

Cost savings: €20,000 in heating oil alone.

INDUSTRIAL IOT EXAMPLE

SLIMME MATRASSEN

SLIMME MATRASSEN

CONCEPT

Monitoring recumbency and other bioparameters of patient during sleep, especially in nursing homes and home care.

Software Unlock: Mattresses already contain sensors upon purchase.

STATUS:

Product development

SPINOFFS:

- More concepts possible, such as smart beds and smart wheelchairs

NEXT-STEPS

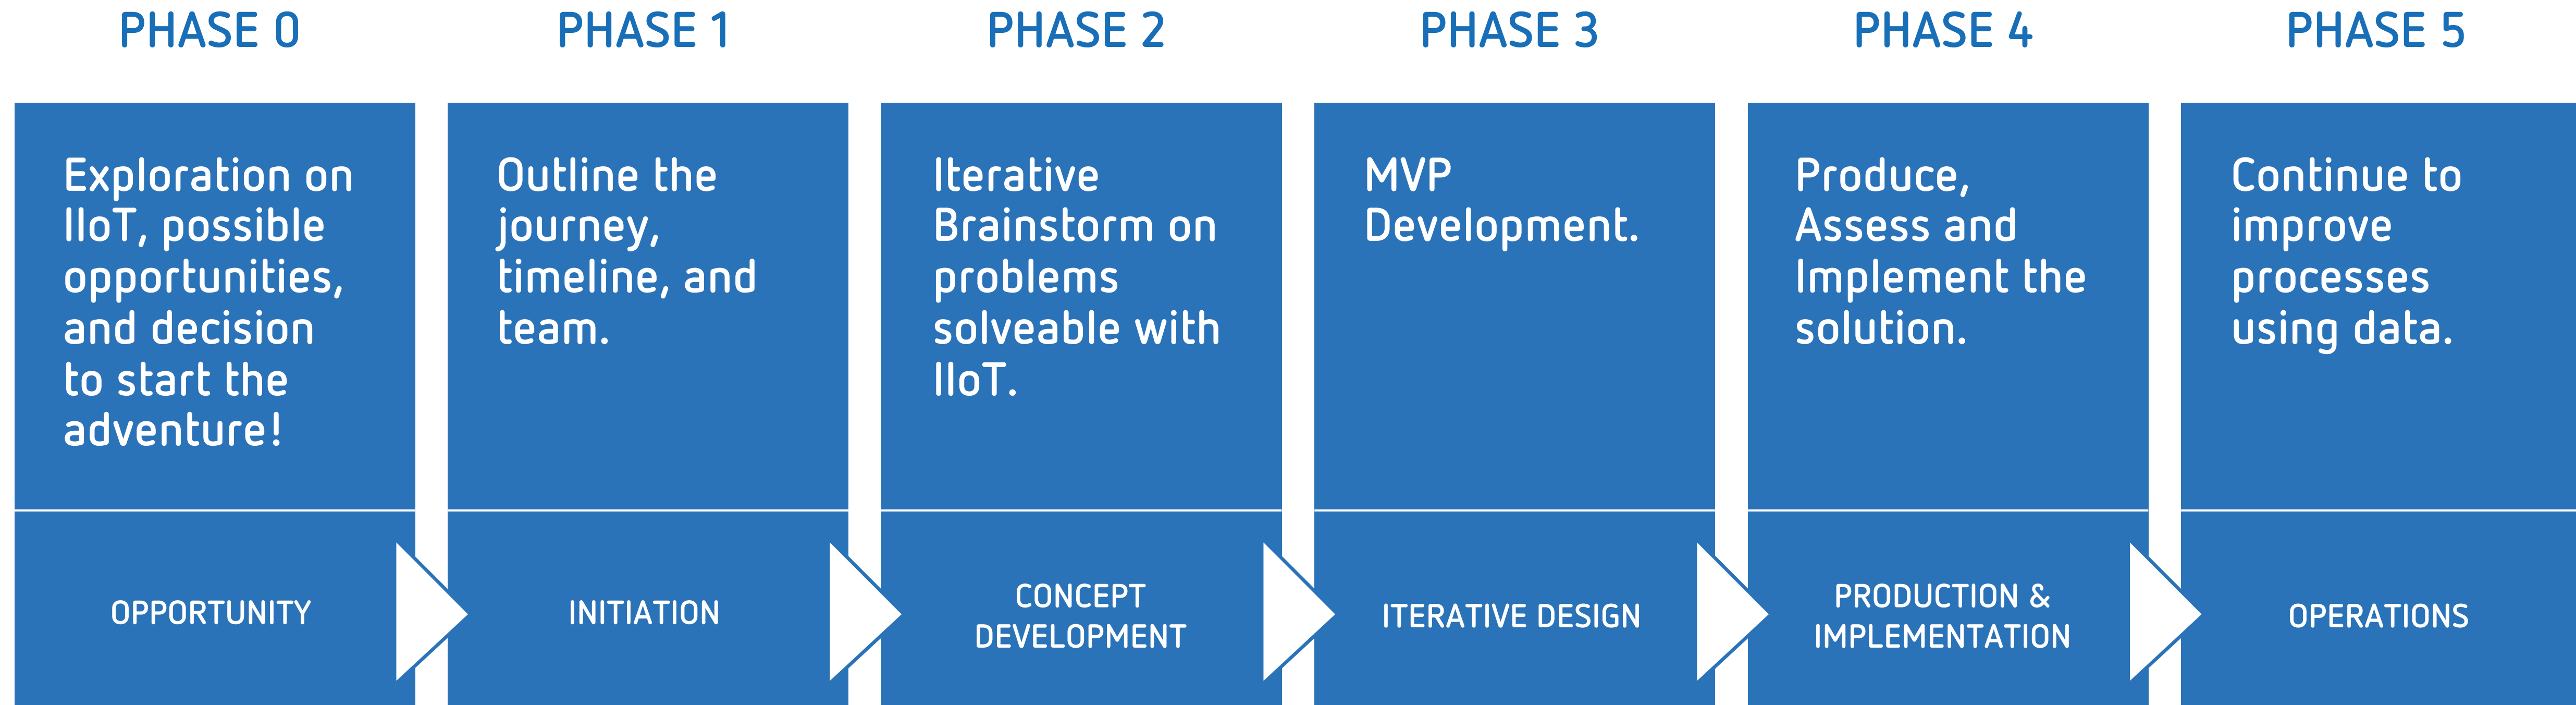

- Integrating first batch smart mattresses

INDUSTRIAL IOT

Fast Integration of IIoT

Integrating IIoT is easier than ever before

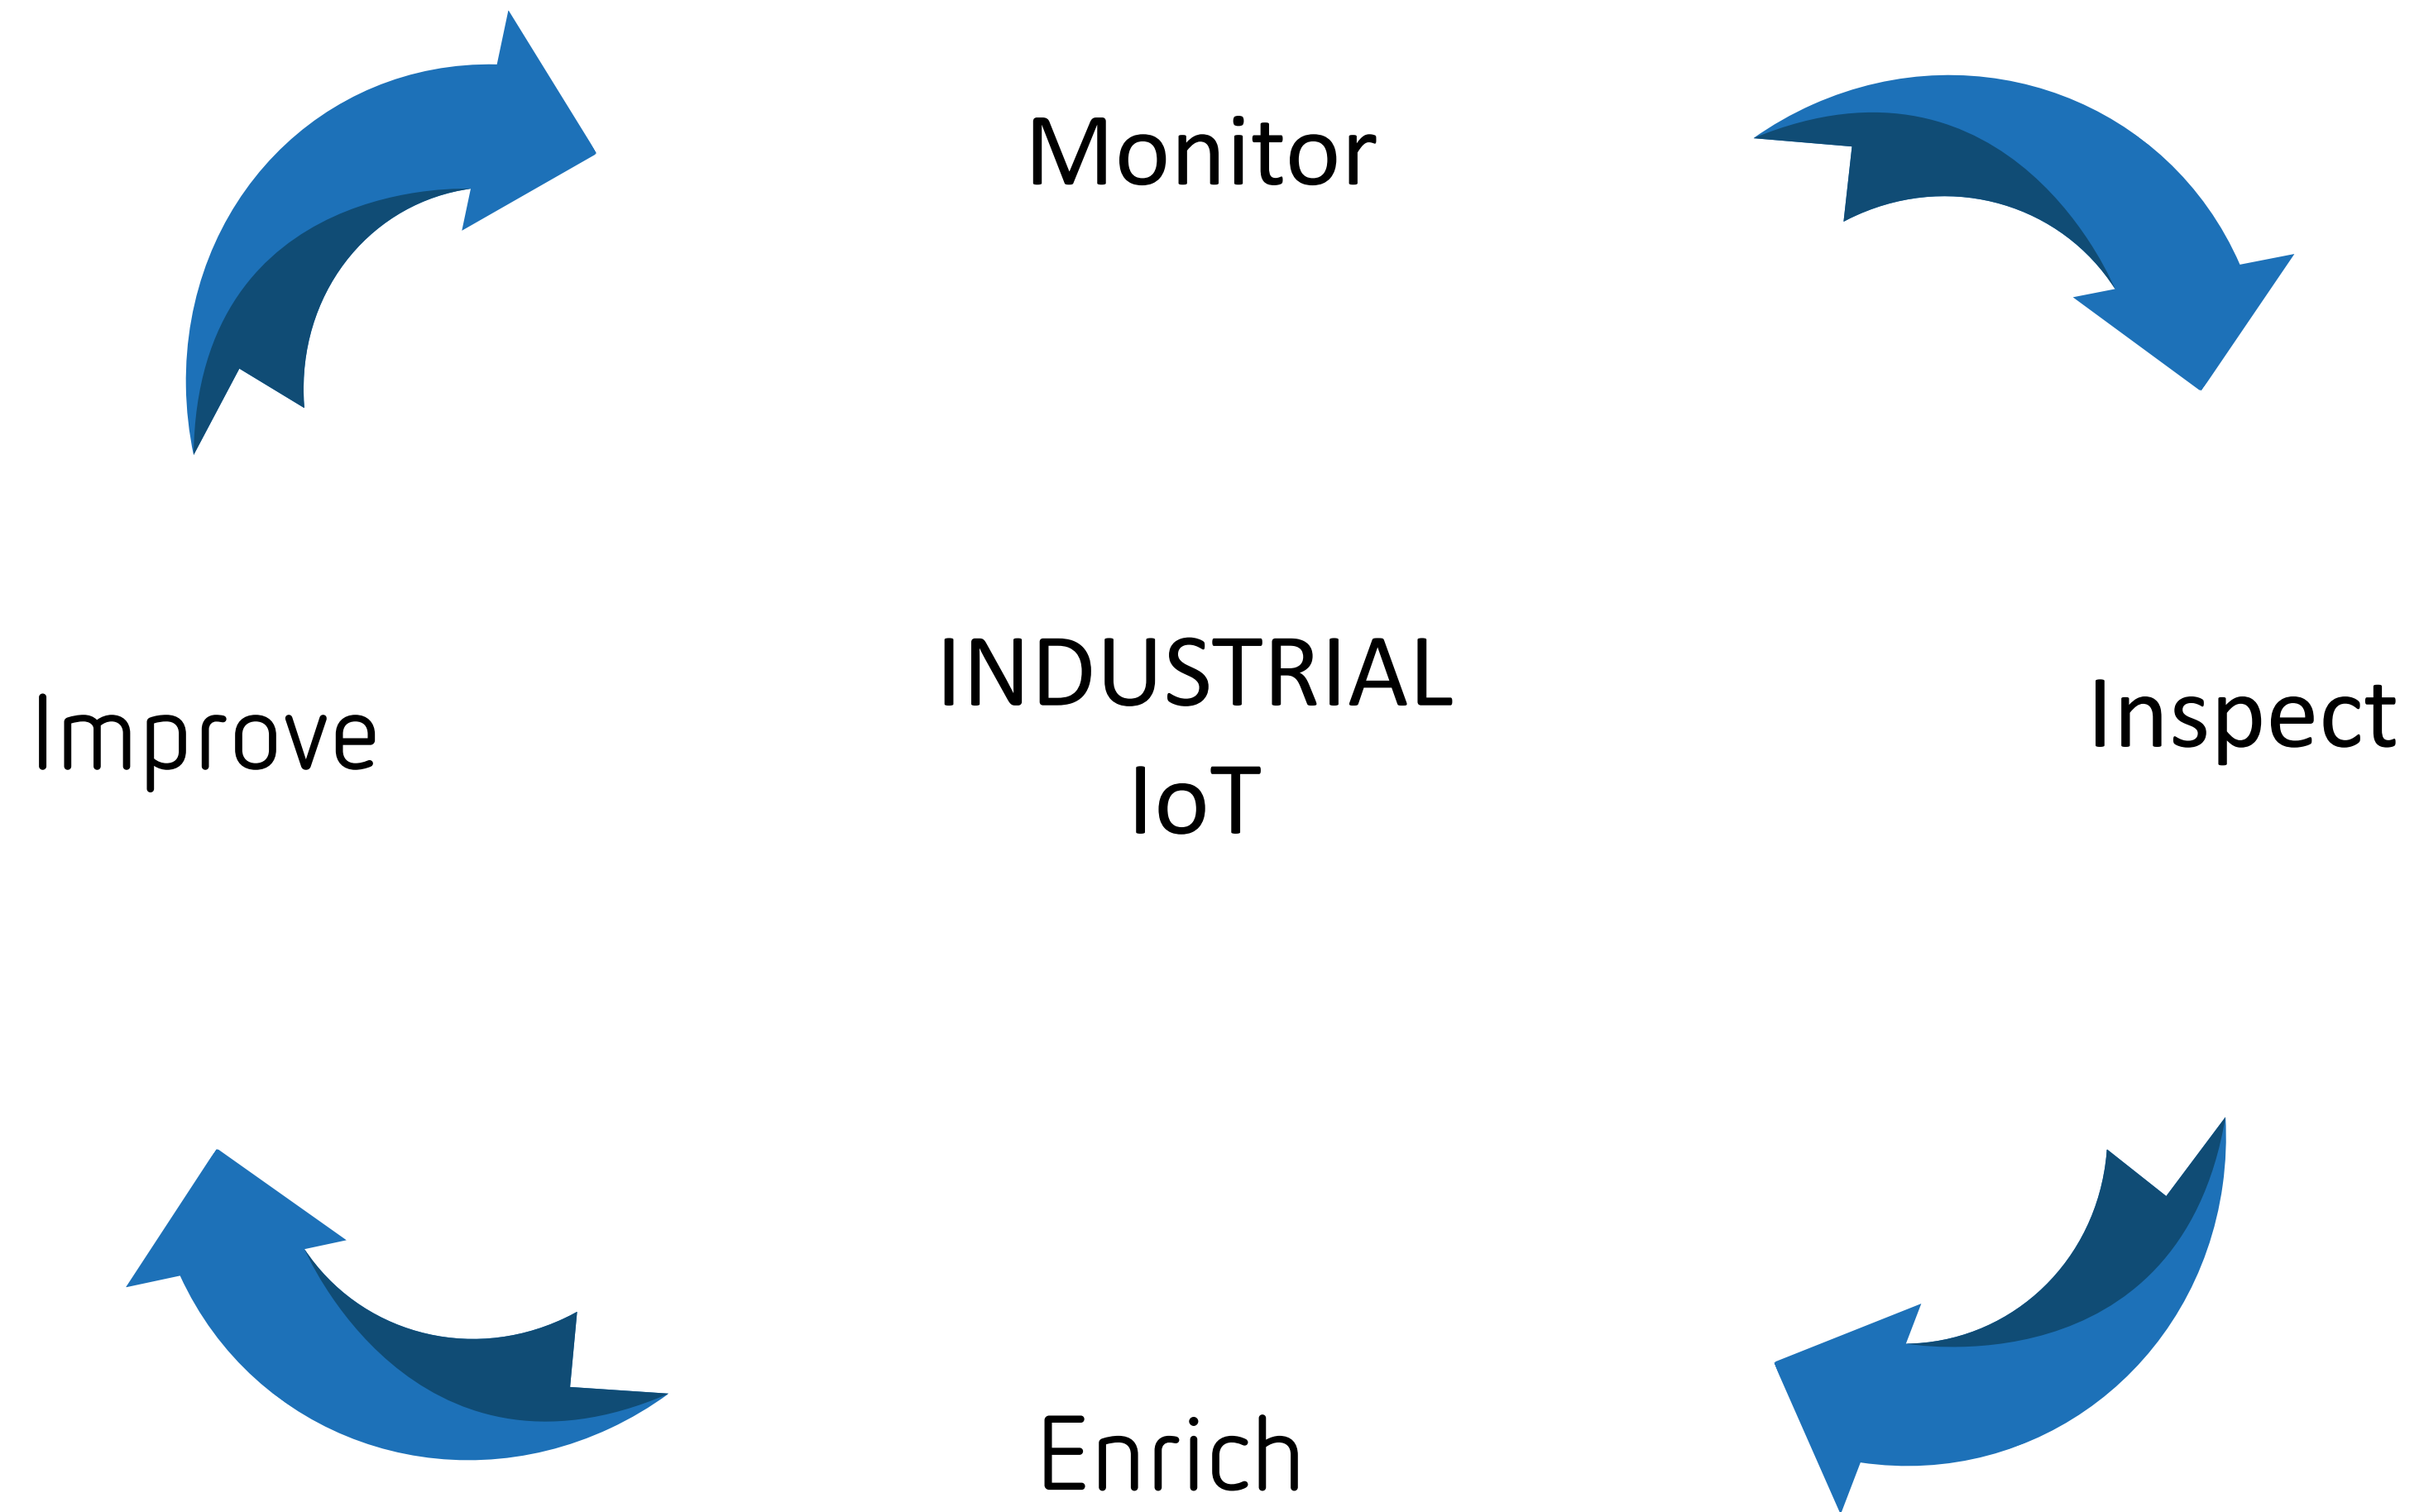

We believe in your dreams. Together we build the future.

Month 6?

Making sure your business runs with an optimized Asset Management Process

The right sensor and measurement solution for your application

We can help you with custom solutions, very quickly

The right sensor and measurement solution for your application

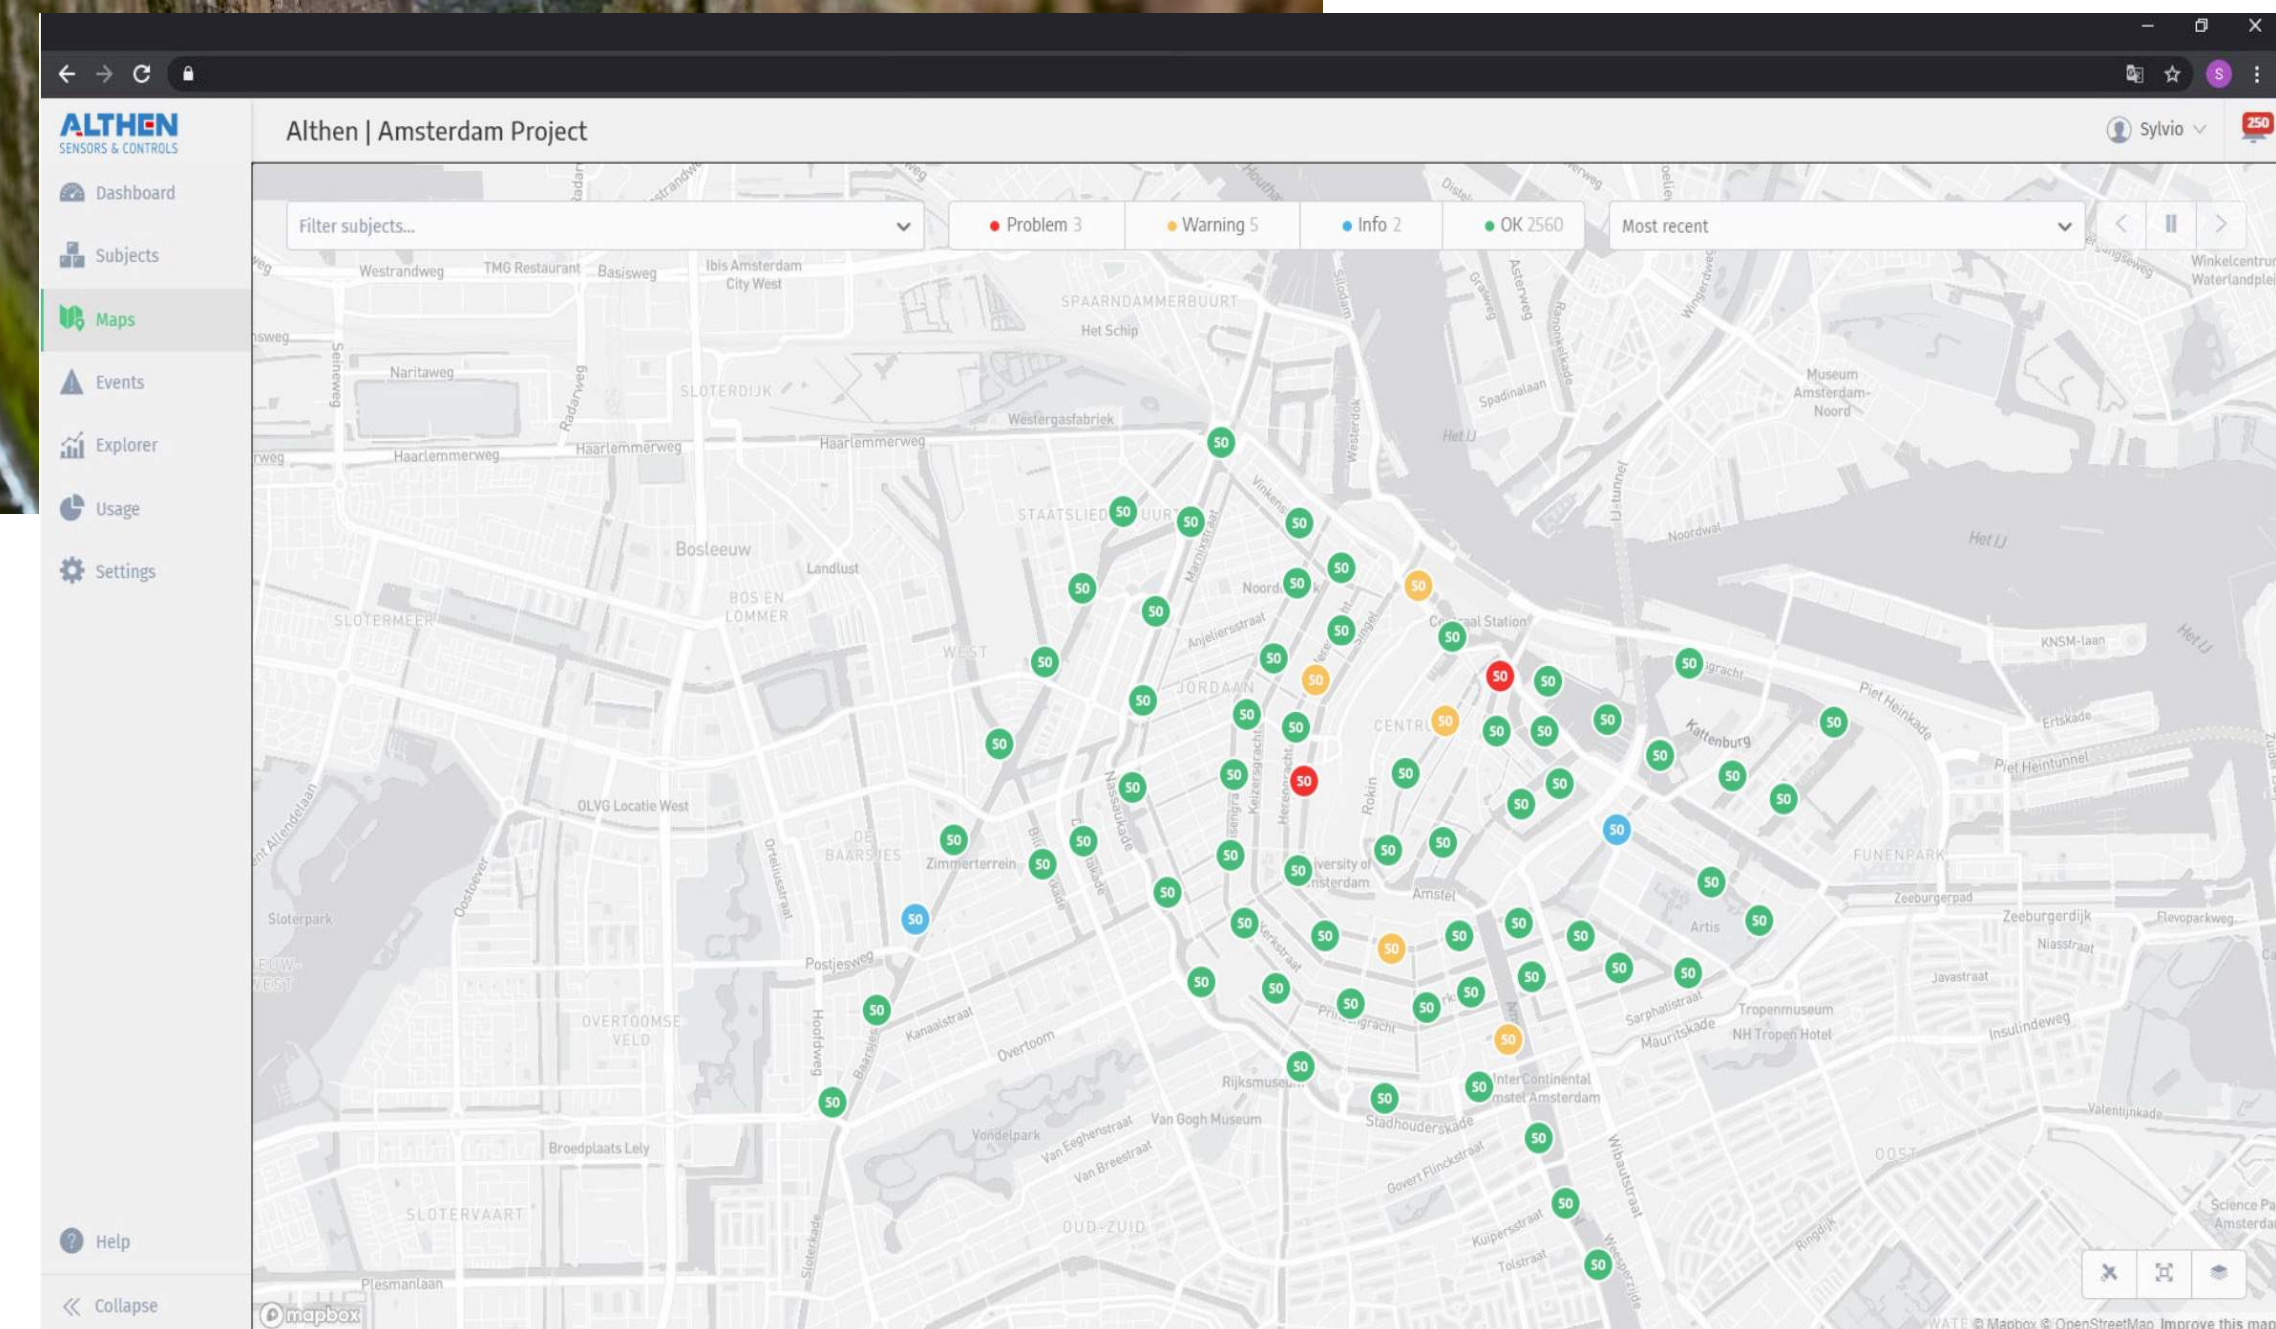

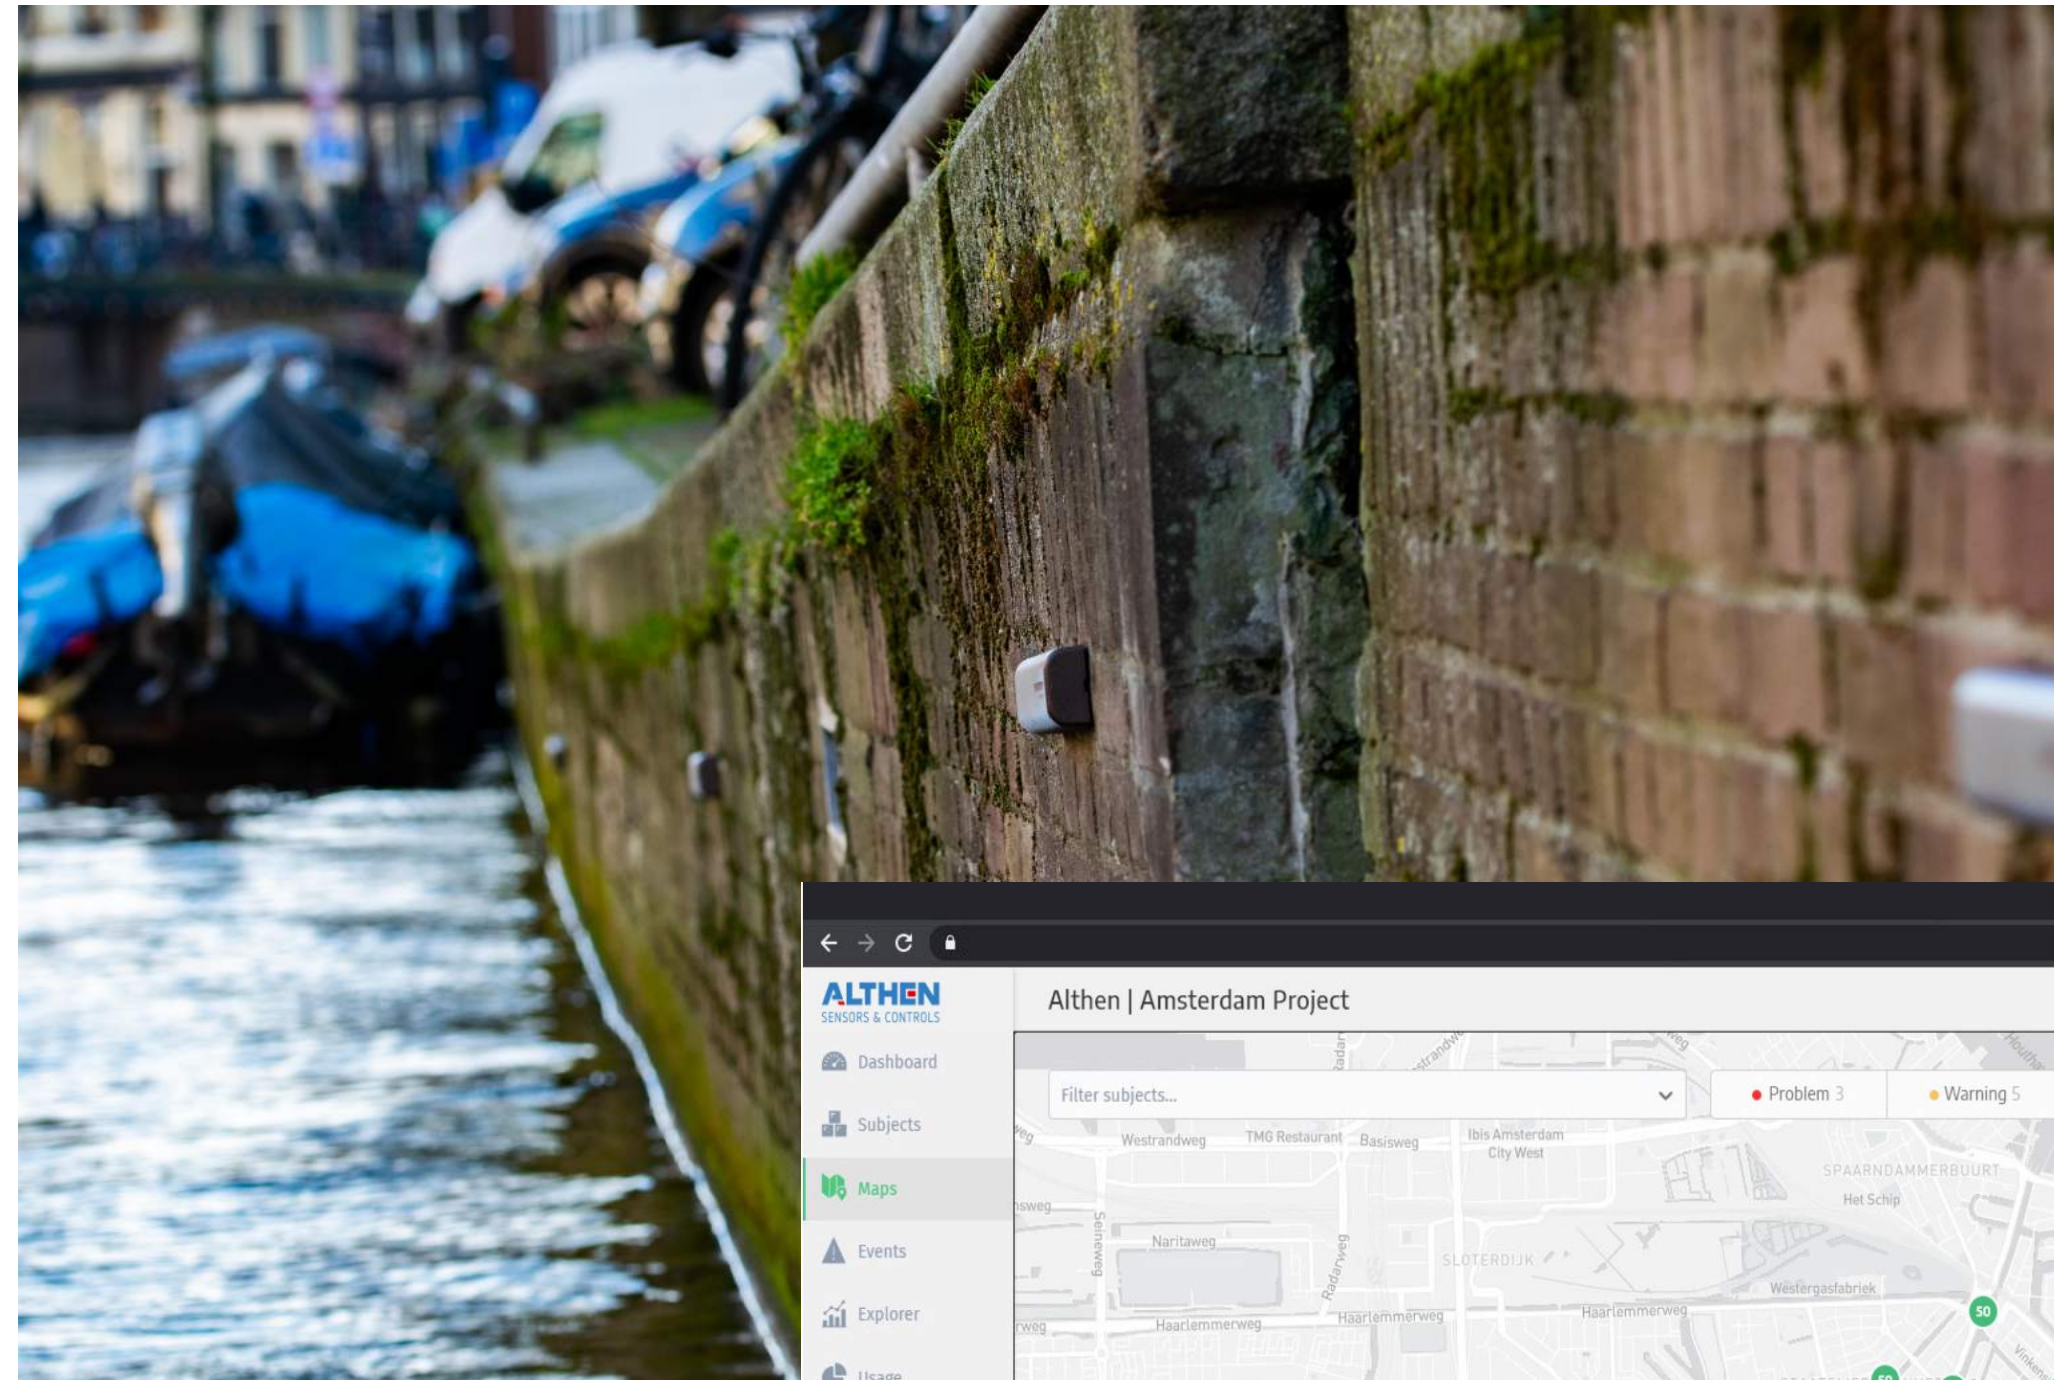

FAST IOT

PROCESS

Your IoT Solution, within 6 months:

- Custom Hardware Plug&Play ready
- Custom Platform Plug&Play ready
- Integration timeline: Your choice.

HARDWARE PARTNERS

- PCB Designer & Producer
- Connectivity Supplier
- Casing Supplier

SOFTWARE PARTNERS

- Data Acquisition and Security
- Dashboard Implementation

OPERATION PARTNERS

- Customization
- Implementation
- Maintenance

END-TO-END SOLUTION DEVELOPMENT:

- Concept development
- Manufacturing and implementation
- Operations DaaS

A-TEAM PROPOSITION

CO-CREATION WITH END-USERS:

- Demand driven concepts
- Win-Win solutions!

DATA-AS-A-SERVICE

- Custom development and deployment of IIoT with a DaaS-proposition

END-TO-END SOLUTION DEVELOPMENT

- Development
- Production
- Implementation
- Operations

CO-CREATION AND VALUE SHARING WITH PARTNERS

- End user define problem statement
- Althen develops and implements sensor concept
- Althen operates in a DaaS

IIoT Custom Sensing Capabilities

The right sensor and measurement solution for your application

THE BUILDING BLOCKS FOR YOUR REQUIRED IIOT SYSTEM

bar PRESSURE	N FORCE	kg WEIGHT	Nm TORQUE
ϵ STRAIN	mm DISPLACEMENT	α ROTATION	 INCLINATION
g ACCELERATION	m/s^2 VIBRATION	$^\circ/s$ ANGULAR RATE	$^\circ C$ TEMPERATURE
 SIGNAL CONDITIONING	 DATA LOGGING	 AUTOMATION	A TURN-KEY SYSTEMS

WHAT IS YOUR MEASUREMENT PROBLEM?

WHERE ARE BOTTLENECKS WHERE IIOT
COULD BE A POTENTIAL SOLUTION?

WHERE ARE INEFFICIENCIES IN YOUR
CURRENT PROCESSES?

**Brainstorm
your problems**

Develop your vision

Thank You!
